To Our Valued Customer,

NEPCO has been serving the sign, graphics, and awning industry since 1928. We provide only the highest quality sign and awning products at the most reasonable prices in the industry. Our commitment to customer service has earned us thousands of returning customers in the Northeast and beyond.

The NEPCO sales staff is thoroughly knowledgeable in all facets of the sign and awning industry and is prepared to assist you wherever possible.

Just a few reasons why using NEPCO Products will better serve your needs:

- SIGN and AWNING industry sales staff.
- Weekly deliveries to MA, RI, CT, NH, ME and Albany, NY.
- UPS orders ship same day.
- Custom cutting service on Polycarbonate and Aluminum.
- Neon manufacturing and repairs.
- All major credit cards accepted.

Consider choosing NEPCO for your next supply order. You won't be disappointed.

Sincerely,
Your Nepco Team

Our Office and Warehouse is located at:

125 Amaral Street

East Providence, RI 02915

Ordering

When placing an order, please be certain to give your sales representative all pertinent information i.e. color, size, quantity and all item numbers (if known). Following this procedure will ensure accurate processing of your order. We encourage the use of fax or email.

Returns and Defective Product

Please contact our returns department and a return authorization number will be assigned. All return claims must be made within 30 days of the invoice date. Defective items do not apply. Any unused items must be returned in its original packaging. We reserve the right to charge a fifteen (15%) percent restocking and handling fee on all returnable merchandise.

At no time, will NEPCO accept the return of lamps that are out of their case, even if they were purchased out of their case. NEPCO reserves the right to refuse the return of any item. (Our driver will test all bulbs for you on delivery)

NET Terms

Open accounts are available to qualified companies on credit approval. Open accounts carry net 30 terms with interest charges of one and one half (1.5%) percent per month levied against all delinquent accounts.

To open an account, please contact your sales representative. They will ensure that you are emailed a credit application package from our credit department. Please allow up to 30 days for approval notification. Until such time, all accounts will be on a pre-paid or COD (credit card or company check) basis.

Return of Checks Due to Insufficient Funds

Processing bounced checks is costly, so we will automatically add a \$30.00 charge to your account for any and all checks that do not clear the bank.

Please call us if you have any questions!

Directions from Connecticut & Boston Areas

95 to 195 East take exit 7 (114 Barrington). Take first exit (114 North, Pawtucket Avenue), at end of exit take a left onto Wampanoag Trail, go approximately 200 yds and take a left onto Amaral St. Nepco is located on your right at 125 Amaral St.

Directions from Eastern Massachusetts

195 West take exit 1 (114A Seekonk, Barrington) at end of exit take a left towards Barrington. Go through two traffic lights and bear right following signs to 114A South. Go through one light, immediately bear right onto 114 North, take your first exit (Pawtucket Avenue, 114 North) then take your first right onto Amaral St. Nepco is located on your right at 125 Amaral St.

Delivery & Shipping Options

Nepco offers delivery service throughout New England & nearby New York. Our delivery vehicles are standing by to provide accurate, timely delivery with orders received by 4:00PM the day prior to your scheduled delivery. Please note that the minimum for delivery will vary based on your location. Call our customer service department for your minimum order requirement.

Nepco offers FREE UPS on most graphic supply orders over \$200! This includes ALL cut vinyl, digital products, tapes, blades, inks, etc.* FREE UPS on ALL heat transfer material & accessory orders over \$125. Additional fees will apply to any liquid, oversize item and special packaging. Orders placed before 3:00PM will ship the same day. One transit day to RI - MA - CT - NH - VT - ME (The majority of Maine). Minimums for above graphic supplies & heat transfer material are subject to change without notice.

****UPS has implemented a handling fee per package for anything over 48".**

Free UPS deals on MOST graphic supply orders DO NOT include the following items: Glass Products, Sheeting/ Blanks, Frames/Stakes/Scrolls, Ballasts & Transformers, Wire, Awning Tubing & Fittings, Fabric, Paints & Thinners, Sign Bases & Sign Posts, Lighting Fixtures

NEW ENGLAND'S PREMIER AWNING & MARINE CANVAS SUPPLIES DISTRIBUTOR

ARLON

DPF 4600LX 3.2 mil • 7 Year • Premium Pressure Sensitive Vinyl Film

Light Grey Solvent Based Tinted Clean Removing, Repositionable Adhesive

Eco-Solvent - Solvent - Latex - UV

DPF 4600LX is a white gloss high performance film with a tinted, clean removing, repositionable adhesive system. The repositionable light gray adhesive allows for easy installation while ensuring enough opacity for covering up existing graphics or dark substrates. The new LX (Low Profile) X-Scape Technology provides installers the benefit of a bubble-free installation combined with a smooth printed surface that doesn't show the pattern through the print. DPF 4600LX works great for vehicle graphics & wraps.

Recommended Applications:

- Vehicle Wraps and Decals
- Window & Tradeshow Graphics
- Real Estate Signage
- POP Displays
- Other Standard Signage

ARLON

DPF 6000 XRP 2.0 mil • 7 Year • Premium Clear Cast Film

Light Grey Solvent Based Clean Removing, Repositionable Adhesive

Eco-Solvent - Solvent - Latex - UV

DPF 6000XRP is a gloss white cast film with bubble releasing, tinted, clean removing, repositionable, permanent pressure-sensitive adhesive. The X-Scape Technology™ allows installers to achieve speedy installation while maintaining a high enough tack to ensure long-term bond. Designed for large format graphics, DPF 6000XRP is made of premium quality cast facestock with a lay-flat liner. The adhesive system is designed to provide excellent opacity & easy installation. The film provides superior conformability around rivets, curves, contours & channels.

Recommended Applications:

- Full/ Partial Vehicle Wraps
- Fleet Wraps
- Multipurpose Commercial

SLX™ Cast Wrap 2.0 mil • 7 Year • Premium Cast Digital Film

Light Grey Clean Removing, Repositionable Adhesive

Eco-Solvent - Solvent - Latex - UV

SLX™ Cast Wrap is a premium gloss light grey repositionable cast film with FLITE Technology™. Designed for the single installer, this film allows for a fast wrap and superior repositionability for full and partial, vehicle and fleet applications. FLITE Technology is a light contact system allowing graphics to float over a substrate until firm pressure is applied. It guarantees the fastest installation while ensuring long-term bond, conforming effortlessly around rivets, complex curves & deep channels.

Recommended Applications:

- Vehicle Wraps
- Vehicle Graphics & Decals
- Fleet Graphics

ORAFOL **Orajet 3621** 3.0 mil • 4 Year • Soft Calendered PVC Digital Media

Grey Water Based Removable Adhesive

Eco-Solvent - Solvent - Latex - UV

Orajet 3621 is an economical calendered inkjet media for short-term interior and exterior graphics that **require easy removal**. ORAJET 3621 has a water-based, removable, grey-pigmented adhesive that delivers great covering power. Designed for flat-surface applications.

Recommended Applications:

- Short to Medium-term General Signage
- Decals
- Name Plates
- Die-Cut Letters
- Pop Displays

SKU	SIZE	COLOR
3621-54-G	54" x 50YD	White Gloss
3621-54-M	54" x 50YD	White Matte

ORAFOL **Orajet 3258** 6.0 mil • 4 Year • Semi Rigid Permanent Adhesive

Grey Solvent Based Permanent Adhesive

Eco-Solvent - Solvent - Latex - UV

Orajet 3258 is the perfect film for those moments when you don't want to use an over-laminate or application tape but still need the stability and ease of installation that a 6 mil film provides.

NEW!

Recommended Applications:

- Bumper Stickers
- Point of Purchase Displays
- Promotional Multi-Color Labels & Decals

SKU	SIZE	COLOR
3258G-30	30" x 100'	Gloss White
3258M-30	30" x 100'	Matte White
3258G-54	54" x 100'	Gloss White
3258M-54	54" x 100'	Matte White

Helpful Tip!

Rolling digital media tightly around the core after printing will cause the solvent gases in the inks to be trapped. These gases could potentially migrate to the adhesive layer of the material, resulting in poor adhesion properties once applied to the intended substrate.

DPF 4500 GLX/MLX 3.0 mil • 5 Year • Intermediate Calendered Digital Vinyl Film

Light Grey Opaque Solvent Based Permanent Adhesive

Eco-Solvent - Solvent - Latex - UV

DPF 4500 GLX/MLX is constructed of a 3-mil white calendered film offered in gloss or matte and coated with tinted, bubble releasing, permanent pressure-sensitive adhesive. The LX (Low Profile) X-Scape System allows installers to achieve speedy installation while maintaining high enough tack to ensure long-term bond. The polymeric facestock allows for vibrant prints combined with ease of application for short and medium-term graphics.

Recommended Applications:

- Short to Medium-Term Signage
- Real Estate Signage
- POP Displays
- Tradeshow Displays
- Kiosks

DPF 8200 3.5 mil • 7 Year • Industrial Grade Film for Hard-to-Stick Surfaces

Clear High Tack Permanent Adhesive

Eco-Solvent - Solvent - Latex - UV

DPF 8200 High Tack is a 3.5-mil (90 micron) satin white, high-tensile, PVC film with aggressive, permanent pressure-sensitive adhesive. The film is made of a 100% engineering-grade facestock with a polycoated lay-flat liner. The unique low shrink adhesive system enhances dimensional stability, improving printer handling and converting time. Designed to adhere to slightly textured outdoor wall substrates such as brick, tile, and concrete, the film also has exceptional performance on low surface energy substrates such as polypropylene, polyethylene, and powder coated paints. DPF 8200 High Tack is fire certified under ASTM E-84.

Recommended Applications:

- Outdoor Wall Graphics
- Large Graphics
- Low Surface Energy Plastics
- Decals
- General Signage

3850-54	54" x 50YD	White Semi Gloss

Do you know the difference between Solvent Based Adhesives and Water Based Adhesives?

Solvent-Based Adhesives

Solvent-based products are designed for more demanding and longer term applications. The components of this adhesive are combined using solvents, thus allowing a structurally stronger adhesive that is more resistant to chemicals, cleaning agents and wider temperature ranges.

Another important attribute is the ability to wet apply graphics without worry of the adhesive losing bond to the substrate.

Water-Based Adhesives

Products with a water-based adhesive, typically are a low-cost solution for either indoor or short-term outdoor graphic applications. This type of adhesive is found in a wide range of versatile projects like decorative wall graphics, indoor wall murals & way finding signage.

Avoid wet applications when applying water-based adhesive products as this will interfere with the bonding process to the substrate.

Mix & Match Overlaminates & Vinyls

Have you ever wondered how to choose the right overlaminate for your large-scale graphic application? Did you know that the right overlaminate will increase the life of your graphics as much as 50%? Overlaminates are just as important as the vinyl choice itself.

The common misconception about this topic is that you cannot mix and match cast overlaminate with a polymeric or monomeric vinyl. This is not true, and here's why. As long as the overlaminate is a higher quality than the underlying printed vinyl itself, you can mix and match it. You never want to put a lower quality overlaminate over a cast vinyl because this will cause shrinkage & edge curl.

3960-5407-100	54" x 25YD	Clear Gloss

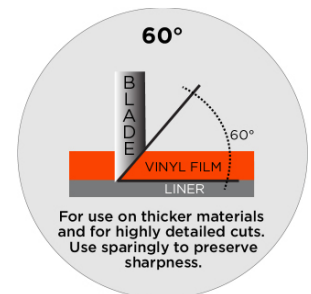

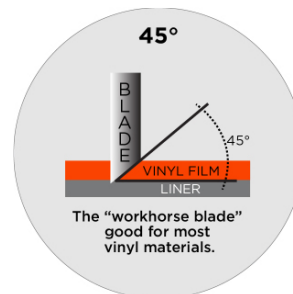

NEW!

Laminating & Contour Cutting Using ProTec Series 3960

Contour Cutting Tips

Prior to the contour cutting process, all heaters (pre, print and post) on hybrid devices such as Roland XR-640 (with cutter and printer in one) must be turned off and allowed to cool to room temperature.

- Highly recommended to use a dedicated contour cutter that can reach at least 300gF in cut force.
- For contour cutters that cannot reach 300gF, 2-3 cut passes can be performed if your cutter is capable of that function.
- Use a 60° tough OEM blade (super-steel or cemented carbide) that is intended for thick materials.
- Lower the speed of the cutter to protect the blade.
- Perform many test cuts to ensure proper cutting conditions are met before beginning the job.

Laminating Tips

ProTec Series 3960 is designed to be laminated cold. All heaters in the laminator should be turned off prior to the lamination process.

- Keep the production area clean and dust free to prevent particulates from contaminating the lamination process.
- Use a static string or static bar that is grounded to the frame of the laminator to reduce static.
- Use proper tension to ensure that 3960 is laminating straight.

Lumina 7262 Static Cling 7.5 mil • 3 Months • Calendered Gloss Media

Blockout - No Adhesive - N/A

Eco-Solvent - Solvent - Latex - UV - Screen - Thermal

Lumina 7262 Static Cling print media is a calendered gloss static cling vinyl film designed for printing window graphics & decals. 40°F minimum application temp. Interior or smooth extension & non-perforated.

Recommended Application:

- Glass Application
- Decals

SKU	SIZE	COLOR
7262-WHT-1508	15" x 25	Gloss White
7262-CLR-1508	15" x 25	Gloss Clear
7262-WHT-3008	30" x 25	Gloss White
7262-CLR-3008	30" x 25	Gloss Clear

Helpful Tip!

Graphics that are trimmed or plotted directly through the ink within 24 hours after printing can begin to show signs of curling or shrinking around the perimeter once applied to the substrate.

Why does this occur?

The freshly printed (uncured) solvents used in the inks to print the graphic are migrating around the cut line and irritating the perimeter of the adhesive layer. This in turn causes the edges of the material to curl up or shrink either on the release liner or once applied to the substrate.

DIGITAL MEDIA

SPECIALTY — TRANSLUCENT

Orajet 3850 3.0 mil • 7 Year • Translucent Calendered Digital Media

Clear Solvent Based Permanent Adhesive

Eco-Solvent - Solvent - Latex - UV

Orajet 3850 is high-performance, 3-mil, 7-year translucent inkjet media and is excellent for producing brilliant backlit signage, both indoors and out. ORAJET® 3850 features a semi-gloss finish for reduced glare and a clear, permanent adhesive for internally illuminated applications that last.

Recommended Applications:

- Long-Term use on rigid substrates in backlit Indoor/Outdoor Applications

SKU	SIZE	COLOR
3850-30	30" x 50YD	White Semi Gloss
3850-54	54" x 50YD	White Semi Gloss

SBL7 8 mil • Universal Polyester Translucent Backlit Film

Eco-Solvent - Solvent - Latex - UV

SBL7 is the universal non-adhesive polyester backlit film with a matte surface. It is ideal for backlit signage applications and provides maximum transmitted and reflected ink density, ensuring vivid color and high image resolution. It has excellent scratch resistance and does not require lamination.

Recommended Applications:

- Backlit Displays
- Menu Signs
- General Signage
- Retail Advertising
- Trade Show & Installation Graphics

SKU	SIZE	COLOR
SBL-7-36-WHT	36" x 100'	White Matte

DPF 6500 2 mil • 7 Year • Premium Translucent Cast Film

Clear Solvent Based Permanent Adhesive

Eco-Solvent - Solvent - Latex - UV

DPF 6500 is a gloss white, cast, translucent film with a permanent pressure-sensitive adhesive. Designed for backlit graphics, DPF 6500 is made of a premium cast facestock with a special lay-flat liner. The film provides superior print resolution and image quality.

Recommended Applications:

- Windows
- Second Surface Signs
- Backlit Signage

SKU	SIZE	COLOR
4065-3015-020	30" x 50YD	White Gloss
4065-5407-020	54" x 25YD	White Gloss

Helpful Tip!

Polycarbonate outgases for a period of time after manufacturing, which can cause bubbles in your vinyl. To prevent this, remove the protective film as soon as possible and allow the polycarbonate to outgas naturally for at least 24 hours before applying the vinyl (longer if possible).

GFPOSTER8S 8 mil • Coated 1 Side Printable White, Promotional

Eco-Solvent - Solvent - Latex - UV

Magic GFPOSTER8S is an 8 mil premium poster paper with a superior satin finish. The award-winning Magic satin coating produces vibrant colors for long lasting, fade resistant prints.

Siser ColorPrint Easy 3.2 mil • PU Composition with Polyester Backing and White Base

Eco-Solvent - Solvent

ColorPrint Easy is the easiest weeding print and cut material ever! Compatible with eco-solvent and solvent based printers/cutters ColorPrint Easy is just what the name says- EASY! Simply print and cut your design, weed the excess with ease, and mask. ColorPrint Easy applies at only 300° F, which gives you the ability to apply to special materials that require a lower application temperature.

Recommended Application:

- Cotton
- Polyester
- Poly/Cotton Blends
- Leather
- Lycra®/spandex

SKU	SIZE	COLOR

Siser ColorPrint PU 2.8 mil • PU composition with Polyester Backing and White Base

Eco-Solvent - Solvent - Latex

ColorPrint PU is a thin & stretchable print and cut material. Looking to create stretchable full-color graphics from your Eco-Solvent or Solvent based printer/cutter? ColorPrint™ PU is the answer to your needs! It's thin enough to provide a great hand and stretchable enough for most performance wear. ColorPrint™ PU is great because it doesn't require any dry time before masking.

Recommended Application:

- 100% Cotton
- 100% Polyester
- Poly/Cotton Blends
- Lycra®/Spandex
- Leather

Siser ColorPrint Sublithin 4.3 mil • Print & Cut for Materials for Sublimated Sports Garments

Eco-Solvent - Solvent

Standard print and cut material isn't formulated for use on sublimated jerseys. If you apply a regular printable polyurethane vinyl onto a sublimated garment, you'll get what's called "dye migration". Dye migration is when the sublimation inks bleed through the vinyl, causing your designs to look muddy or splotchy. ColorPrint Sublithin is specially formulated to work with most eco-solvent and solvent based inks and printers to block this dye migration and keep your graphics looking sharp on any kind of sublimated polyester garment! Great for all polyester motocross, soccer and hockey jerseys with full sublimation.

Recommended Application:

- 100% Cotton
- 100% Polyester
- Poly/Cotton Blends
- Sublimated Polyester

ORAFOL Oralite 5600 5.0 mil • 7 year • Fleet Engineer Grade Digitally Printable Reflective Film

Clear Solvent Based Permanent Adhesive

Eco-Solvent - Solvent - UV - Latex

Oralite 5600 is flexible, printable reflective film and is the perfect choice for emergency vehicle graphics and other applications where a durable, conformable and removable* reflective film is required. Solvent inkjet and thermal-print compatible, this innovative reflective film provides endless creative options.

*Removable with heat.

Recommended Application:

- Vehicle Graphics
- Reflective Lettering
- Fleet Markings
- Decorations

Reflectives How does it work?

Reflective is made by mixing glass beads in the pigment of the face film. The embedded beads reflect light back toward the viewer when illuminated. Therefore retro-reflective film is also referred to as beaded reflective.

These embedded beads make retro-reflective sheeting more difficult to cut than standard PVC vinyls. **Always use a 60° blade** when cutting retroreflective sheeting. You can make it work with a 45° blade and lots of force, but that blade will be worthless when you're done.

DIGITAL MEDIA

PRINTABLE REFLECTIVE FILM

Nikkalite M8500 Series 5.34 mil • 7 year • Fleet Marking Grade Retroreflective

Clear Acrylic Resin Permanent Adhesive

Eco-Solvent - Solvent - Latex

M8500 Series is a product manufactured for use as fleet marking, vehicle markings, sticker, decal, etc. which can be either digital-printed or screen-printed with multi-colored inks that will adhere very well to this sheeting. Coated with a pressure sensitive adhesive protected with an easily removable liner, this sheeting is easy to handle because of its great flexibility and is capable of giving high retro reflectivity, even when totally wet.

Recommended Application:

Stick2 7 mil • Polypropylene, Low Tack Removable, Repositionable & Re-Apply

Water Based Repositionable Removable Low Tack Adhesive

Eco-Solvent - Solvent - Latex - Aqueous

Stick2 is a 7 mil repositionable banner with a low tack, pressure sensitive adhesive that is repositionable, removable, and may be reapplied to some surfaces. Has a universal coating that is compatible with most water-based thermal as well as solvent and eco-solvent wide format printers. Can be used indoors and outdoors for both short and long-term signage.

Recommended Applications:

- Posters
- Displays
- Window & Wall Coverings
- Trade Show

SKU	SIZE	COLOR
STICK2-36	36" x 100'	White Matte

Helpful Tip!

Be very cautious when applying vinyl films to flat finish latex painted surfaces. Heavily tinted latex paints contain surfactants (soap-like chemicals) that leach onto surfaces throughout its life, causing adhesive failure. Latex paints also contain plasticizers which can migrate to the adhesives in many pressure sensitive films causing failure. For exterior vinyl applications over a painted surface, we recommend the use of oil-based gloss enamel, or acrylic gloss enamel coatings. For interior vinyl applications over latex painted surfaces, we would recommend an eggshell or satin finish. Surfaces which have been recently painted, always allow at least 3 weeks curing time.

R.Tape Vinyl Efx 1 mil • 3 Year • Decorative Printable Metallized Vinyl

R.tape Vinyl efx is metallized special effects films have always been popular for decorating race cars, billboards, and short-term promotional signage. Vinyl Efx colors are through-and-through the vinyl - NOT laminated or top coated. Unlike cold-embossed polyesters, our fade-resistant films are hot-embossed, which produces deeper, better defined patterns. The Vinyl Efx Outdoor Durable Series, which provides up to three years of outdoor life, is comprised of a variety of cost-effective simulated metal, light-diffracting and 3-D patterns, designed for long-term outdoor signage. For demanding applications such as truck and boat graphics, the Vinyl Efx Durable Series films provide a superior alternative to the expensive simulated gold-leaf films.

Recommended Application:

- POP posters • Displays • Vehicle Graphics • Window Graphics • Tradeshow Graphics • Boat

Siser EasyWeed® 3.5 mil • PU Composition with Pressure Sensitive Backing

Semi-gloss finish

EasyWeed® applies at a lower temperature than competitor material, backing can be peeled hot or cold and doesn't lift during weeding. It's also extremely durable wash after wash and uses a lower pressure setting for application. EasyWeed is thinner than others on the market and offers a one-second tack application that's great for multiple layers. EasyWeed has a pressure sensitive carrier that allows you to offer detailed designs on a wide variety of fabrics. EasyWeed can be cut with laser systems.

Recommended Application:

Siser EasyWeed® Stretch 3.5 mil • PU Composition with Pressure Sensitive Backing

True matte finish

EasyWeed® Stretch by Siser delivers all the benefits of our EasyWeed heat transfer material and combines it with super stretchability to create one remarkable heat transfer material! The thinnest of any Siser material, EasyWeed Stretch has a true matte finish and a soft hand that's available in 20 popular colors, including sweet mint and coral. While EasyWeed Stretch is ideal for performance apparel, the soft hand and light weight often make it a favorite for other garment decorating. EasyWeed Stretch can be cut with laser systems.

Recommended Application:

• 100% Cotton • 100% Polyester • Poly/Cotton Blends • Leather • Lycra®/Spandex

Siser EasyWeed® Glow 3.5 mil • PU Composition with Pressure Sensitive Backing

Matte finish

EasyWeed® Glow is available in white and it cuts and weeds like our popular EasyWeed heat transfer vinyl. To get the glow effect, “charge” the material by exposing it to sunlight. The more light you give it, the more it glows in the dark! Great for crafters looking to create kids’ pillow cases with messages that shine at bedtime. EasyWeed Glow is also perfect for simple Halloween costumes and can be layered on other Siser materials! EasyWeed Glow can be cut with laser systems.

Recommended Application:

- 100% Cotton • 100% Polyester • Poly/Cotton Blends • Leather

Glow in the Dark

Siser **Metallic** 3.9 mil • PET Composition with Pressure Sensitive Backing

Gloss finish

This **Metallic Heat Transfer Vinyl** material is great for adding the look of metallic gold or silver to any garment. Siser Metallic gives the shiny look of a colored chrome. Please note that Metallic is a unique product and that cracking and delamination may occur after washing - **The results are not predictable.**

Recommended Application:

- 100% Cotton • 100% Polyester • Poly/Cotton Blends • Leather

44
Metallic Silver

45
Metallic Gold

Siser **Holographic** 4.3 mil • Polyester Composition with Pressure Sensitive Backing

Gloss finish

Holographic contains color changing chips that create the effect of depth and dimension. Holographic can be cut to look exactly like rhinestones, without having to go through all the extra work associated with applying rhinestone designs. Holographic can be cut with laser systems.

Recommended Application:

- 100% Cotton • 100% Polyester • Poly/Cotton Blends • Leather

01 Holographic
Crystal

13 Holographic
Silver

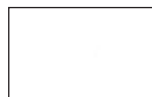

Siser **StripFlock**® 16.1 mil • PVC Composition with Pressure Sensitive Backing

Suede-like finish

A great alternative to embroidery, **StripFlock** gives logos a raised, textured, suede-like feel. Stripflock can be used as a base layer and covered with other materials, giving a very unique, high-end look to logos and designs. In addition, StripFlock is very opaque and has deep, rich colors that are great for animal prints and for layering on top of other materials.

Recommended Application:

- 100% Cotton • 100% Polyester • Poly/Cotton Blends • Leather

01

Siser EasyReflective® 5.5 mil • PET Composition with Pressure Sensitive Backing

Reflective finish

EasyReflective® is Siser's only reflective material with a pressure sensitive backing! This highly reflective heat transfer vinyl is constructed with glass bead technology to illuminate the darkest of conditions. EasyReflective is a truly exceptional polyurethane product due to its pressure sensitive carrier that allows you to re-stick lifting material or replace a piece that's accidentally removed. With a low application temperature and simple warm peel, EasyReflective can be applied to all kinds of garments and accessories that need to stand out in low lighting.

Recommended Application:

- 100% Cotton • 100% Polyester • Poly/Cotton Blends • Nylon (testing recommended)

Reflective Silver

Siser Heat Press

Siser heat presses are the machines you need to get the job done. The Siser Digital Clam Heat Press is ideal for letters & numbers, left chest logos or full-front designs. The Siser Digital Cap Heat Press is perfect for printing caps and hats, as well as applying labels in shirts, shorts, and bags. Whatever you need to print, Siser has heat presses that will help you get it done!

The Siser Digital Clam Press

The Siser Digital Clam Press is a great, economical heat press that works in the shop or on the go at events for on-demand printing. The Siser Digital Clam Press is easy to operate with a digital time and temperature readout and over-the-center pressure adjustment. The upper flotation platen provides a flat, even surface. Used in conjunction with a heat transfer pillow there's nothing you CAN'T print! The Siser Digital Clam Press is ideal for individuals who are just starting out in the industry, as a second press for home or the shop, or as a travel press that you take to live events like car shows, dance competitions, cheer events and more for complete on-demand heat printing and personalization!

Geo Knight & Co Inc Heat Press

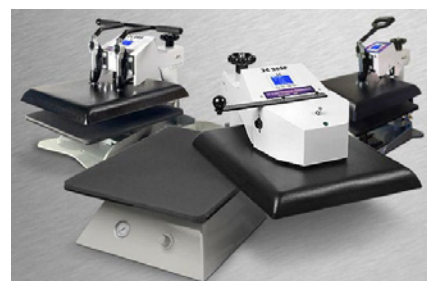

Geo Knight & Co is the premier manufacturer and supplier of heat transfer press machines used for these processes. We specialize in both commercial grade manual heat transfer presses as well as industrial large format automatic equipment.

We accommodate our customers with exactly the machinery they need to transfer press graphics and other embellishments onto a wide variety of materials. We manufacture according to the highest industry standards and only implement solid casting and steel structural frame designs, coupled with state of the art controls and heaters.

Our presses have been the backbone of literally thousands upon thousands of business over the past 4 decades, providing a reliable workhorse of a product that stands up to the demands of imprinting business, manufacturing & personal use.

Swing-Away

Swing-Away presses are used for medium to heavy pressing: garments, plaques, tiles, and other materials.

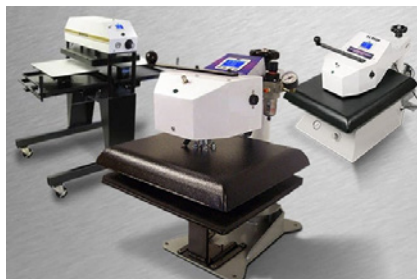

Multipurpose

Our Digital Combo swing-away heat press has a variety of heat platen attachments. This machine does it all.

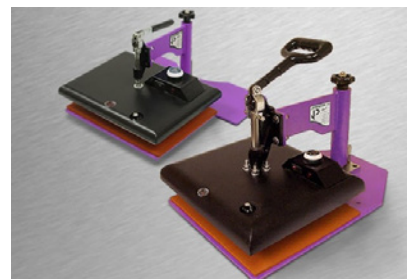

Clamshell

Our clamshell style of heat press equipment meets business and manufacturing needs worldwide.

Automatic

These presses operate automatically, relieving the operator of major tasks of manual machines.

Light Use

The JetPress machines are a heavy duty line of low-cost, economical swing away heat presses.

Roland Eco-Solvent™ Printers

SOLJET® EJ-640

High-Volume Large-Format Printer - Size: 64"

- Dual eight channel piezo inkjet heads with 180 nozzles per channel
- Photographic image quality in all print modes, including high speed
- EJ INK for fast dry times and lower running costs
- Included media take-up system handles rolls up to 110 lbs.

VersaEXPRESS® RF-640

Professional Large-Format Printer - Size: 64"

- Advanced imaging technology with photorealistic imaging at 1440 dpi
- Roland Printer Assist enables printer control from iPad
- Included media take-up system handles rolls up to 110 lbs.

Eco-Solvent™ Printers & Plotters/Cutters

TrueVIS™ VG2 Series

Professional Large-Format Printer - Size: 54" & 64"

- New TR2 ink offers unequalled color reproduction & expanded color gamut
- Elevated print/cut accuracy & smart new automated pinch rollers
- 4-color, 7-color or 8-color configurations— including new Orange ink options
- *Take up unit is included with VG2 models.*

TrueVIS™ SG2 Series

Performance Printer/Cutter - Size: 30", 54" & 64"

- Featuring new TR2 ink for a wider color gamut with brilliantly vivid print output at a very low ink cost per sq/ft
- Offering smart new print/cut features that include automated pinch rollers
- *Take up unit is not included with SG2 models.*

VersaSTUDIO® BN-20

Desktop Inkjet Printer/Cutter - Size: 20"

- Handles a wide variety of jobs on a full spectrum of media
- Includes Metallic Silver and White ink options
- Combine with a heat press to create custom apparel

We stock a wide range of consumable Roland parts.

Please call for availability & pricing!

Roland Plotters/Cutters

CAMM-1 GS-24

Desktop Cutter
Size - 24"

- Efficiently cuts up to 19.7 in/s (500 mm/s)
- Powerful down force of up to 350 gf so you can cut thick materials
- Up to 10x overlap cutting for cutting thicker materials with precision
- Stand included with purchase that holds roll media and offers smooth set up

CAMM-1 GR Series

Professional Cutter
Size - 54" & 64"

- Designed for faster cutting at 58.5 in/s (1,485 mm/s) and an increased down force of 600 gf
- Features 2 blade positions with the front position designed for perforated cutting
- Roland Quadralign™ optical registration system automatically recognizes printer crop marks on printed media

GRAPHTEC Plotters/Cutters

FC8600 Series

Available in 5 Widths

Graphtec FC8600 series high-performance roll feed cutting plotter is an industry leader for sign makers, graphic artists, and other related users. The FC8600 series features a maximum cutting speed of 58.5 in/sec, 4.0 G maximum acceleration, and 20 to 600 g selectable cutting forces, allowing users to process diamond grade, high-intensity reflective film, sandblast resist rubber, automotive window & paint protection films, self-adhesive vinyl, among other media types.

CE6000 Plus Series

Available in 3 Widths

Graphtec CE6000 Plus Series - the built-in front control panel provides complete parameter control including eight preset cutting conditions, as well as advanced features like tangential control mode, down force offset, pen up speed, blade wear monitoring and more. With maximum force of the 4.41 N (450 gf) and a maximum speed of 1000 mm/s, it enable to cut various media with high productivity. With a 25 pin RS-232C or the High Speed USB 2.0 control interface, a newer, larger LCD screen, managing your cutting jobs is simpler than ever!

RS Royal Sovereign Cold Roll Laminators

Entry Level Cold Roll Laminators

The practical and affordable solutions for first time operators entering the wide format lamination industry.

RSC-820CLS (32") & RSC-1401CLTW (55")

- Included stand with casters
- Release liner take-up standard feature
- Durable motor reaching up to 16 ft./min. *(RSC-1401CLTW)
*8ft./min for RSC-820CLS
- Mount substrates up to 5/8" *(RSC-1401CLTW)
*Up to 9/32" for RSC-820CLS

Traditional Level Cold Roll Laminators

Designed and engineered to provide everyday convenience to the advanced user specializing in wide format digital finishing.

RSC-1402CW & RSC-1402HW (55"), RSC-1651LS & RSC-1651LSH (65")

- Lamination speeds over 16 ft./min
- Mount substrates up to 1"
- Foot pedal, cross cutter and rear facing remote standard
- Add front feeder and rear rewinder for roll-to-roll lamination

Roland Eco-Sol Max Ink

Durability up to three years outdoors without lamination. Ink running costs as low as 16¢ per sq. ft. Quick drying time for improved production speed. Improved scratch resistance for increased durability and easy handling. Wider color gamut for reds, blues and greens. Virtually odorless and user-friendly. Aggressively adheres to a broad range of affordable media including Roland's complete line of uncoated and coated media.

Roland Eco-UV Ink

Specifically formulated for the VersaUV's curing system, ECO-UV Ink is perfect for curing at all available print speeds, delivering high color density and wide gamut for exceptional images print after print. ECO-UV adheres to a wide range of coated and uncoated media, including foils, paper, clear films and vinyl for increased versatility. Instantly-drying and extremely flexible, ECO-UV ink produces graphics that can be stretched and applied around curved surfaces and edges without cracking. With ECO-UV, users can choose from two different formulations. ECO-UV stretches up to 220 percent with no signs of peeling and cracking, making it ideal for printing on shrink sleeves and shrink wraps, wrapping PET bottles, and for vacuum forming applications.

Replacement Blades

Roland 45 Degree Carbide Blade

This 45 degree blade is used for cutting standard thickness materials. It is excellent for general purpose cutting of 2-3 mil adhesive backed substrates. The C145 is compatible with all Roland vinyl cutters and printer/cutters.

ROL-C145-SING

Roland 60 Degree Carbide Blade

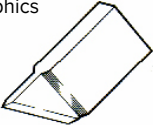

This 60 degree blade is used for cutting thick materials. It is excellent for general purpose cutting of 4 mil and greater adhesive backed substrates. The C160 is compatible with all Roland vinyl cutters and printer/cutters.

ROL-C160-SING

45 Degree Carbide Plotter Blades

Our unique plotter blade design enhancement reduces blade drag and improves cutting of small characters and graphics on standard pressure-sensitive materials. Use the following recommended plotter blade angles when cutting these material thicknesses: 30 degree 2-4 mil / 45 degree 4-12 mil / 60 degree 12 mil+.

SC-1045

Target Plotters:

Anagraph Excel 1/1m
Compugraphicarty
Gerber III/IV, S/750 Sprint Series Lettersmith,GS15 Plus

45 Degree Carbide Plotter Blade

Substitutes for the Mutoh 300936 30 degree, 300937 45 degree and 300938 60 degree blades. For best results, use the following recommended blade angles when cutting these material thicknesses: 30 degree 2-4 mil / 45 degree 4-12 mil / 60 degree 12 mil+ with an offset of .021.

SC-3845

Target Plotters:

Mutoh XP-Series
Gerber Emboss Track, Odyssey
P-Cut 630 Creation

45 Degree Carbide Plotter Blades

Substitute for Ioline PN 103233. For best results, use the following recommended blade angles when cutting these material thicknesses: 30 degree 2-4 mil / 45 degree 4-12 mil / 60 degree 12 mil+ with an offset of .015.

SC-1445

Target Plotters:

Techno-Arts Switchblades
Classic
K-Cad-RBL-C
Ioline Studio 7/8 Artpro Series / Super 88 / Smartrac

45 Degree Carbide Plotter Blades

Substitute for Roland ZEC-U1001 blade. Designed for cutting very small lettering and graphics. For best results, use for cutting on 2-6 mil materials with an offset of .010.

SC-2945

Target Plotters:

All Roland
Allen Datagraph 936/800
CSR Ecom-2

45 Degree Carbide Plotter Blades

Similar to CB-09U blade. Carbide tipped blades offer much better durability and longer performance. For best results, use the following recommended blade angles when cutting these material thicknesses: 45 degree 2-6 mil / 60 degree 6 mil+. with an offset of .0175.

SC-1945

Target Plotters:

Nova Cut
American Graphtec Cutting Pro / FC-Series

60 Degree Carbide Plotter Blades

Similar to CB-09U blade offered by plotter manufacturer, except Simple Solutions' blade tips have the advantage of being constructed out of carbide, not steel! Carbide tipped blades offer much better durability and longer performance. Use the following recommended blade angles when cutting these material thicknesses: 45 degree 2-6 mil / 60 degree 6 mil+. with an offset of .0175.

SC-1960

Target Plotters:

American Graphtec Cutting Pro / FC-Series
Nova Cut

45 Degree Supersteel Blade 0.9mm (2 Pack)

These blades are genuine Graphtec 0.9mm, 45 degree Tungsten Carbide replacement blades. They fit the Graphtec CE-5000-60 and Craft ROBO Pro plotter cutters that we offer and are what comes with the original plotter cutter. Spare blades are the one item that we would have, above all else.

CB09UB-2PACK

GRAPHTEC Blue Tip Blade Holder 0.9mm

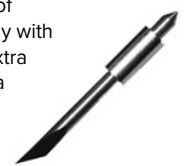

CB09 series blades for FC, FCX, CE Series

PHP33-CB09N-HS

45 Degree Supersteel Blade 1.5mm (2 Pack)

This specialty blade is useful if you are cutting a lot of rhinestone stencils or vinyl flock. It must be used only with the Red Tip blade holder (PHP32-CB15N-HS). The extra thick blade and very robust Red Tip holder provide a very long lasting cutting platform.

CB15UB-2PACK

GRAPHTEC Red Tip Blade Holder 1.5mm

CB15U series blades for FC, FCX, CE Series

PHP33-CB15N-HS

Fletcher 2200 Mat Cutter

Table Top Cutters

Professional level mat or mount board cutter for creating bevels and producing V-Grooves as decorative features and finishes in matboard up to 4-ply. Features a dual cutting feature for matboard specialty cutting or a 90° cutting feature for sizing matboard or cutting of foamboard up to ½" (13mm).

Available machine sizes, 48" (1.2m) or 60" (1.5m).

Titan - Trimmer | Cutter

Table Top Cutters

Designed with a dual position cutting head for cutting semi-rigid materials and a trimming feature for flexible materials such as photo paper and canvas. Engineered with a green cutting strip that gives operator a visible cut line, meaning no need for guesswork and reduces scrap from cutting mistakes.

Mounts on tabletop or stand for shop mobility. Offered in sizes from 40" (1.0m) up to 120" (3.0m).

Fletcher 3000 Multi-Material Cutter

Wall-Mounted - Free Standing Cutters

Features a 3-position cutting turret containing a glass scoring wheel, scoring tip for scoring acrylic materials and a cutting blade for picture frame matboard and foam board materials up to ¼" (6mm). A ramping feature allows the lifting of scoring wheel on top edge of glass resulting in a cleaner edge break when scoring glass. Handles material sheets up to 60" high (1.52m). Mounts on wall or freestanding installation.

Fletcher 3100 Multi-Material Cutter

Wall-Mounted - Free Standing Cutters

Versatile Wall Cutter designed with an interchangeable cutting head platform that uses multiple cutting blades, scoring tips and cutting wheel holders for cutting and scoring a large variety of materials. Handles material sheets up to 63" high (1.6m) and features an acrylic breakout function. Mounts on wall or freestanding installation.

Fletcher FSC Multi-Material Cutter

Wall-Mounted - Free Standing Cutters

Heavy-duty cutter designed with an interchangeable cutting head platform that uses multiple cutting blades, scoring tips and cutting wheel holders. Includes a V-Groove Cutting Tool used with ACM material to allow bending and fabrication techniques. Cutter handles material sheets up to 65" high (1.65m), includes a laser sight line for cutting pre-printed graphics and is equipped with a twin handle cutting head for operator control and dexterity. Mounts on wall or freestanding installation.

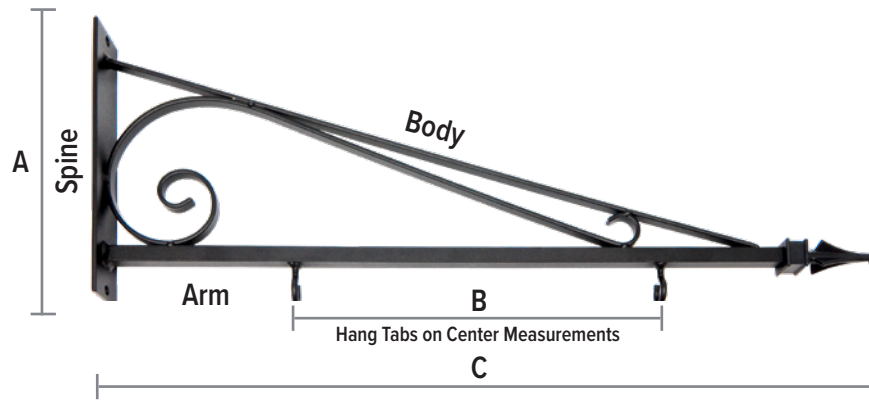

GeminiPro - Large Format Cutter

Table Top Cutters

Recommended for cutting large format graphics. Replaces the common method of a straight edge and knife. Offers sizes up to 120" (3.0m), eliminating the need to re-position the straight-edge. Sight line strip allows operator to line up material for entire length of cut, increasing cutting accuracy.

* All brackets with **adjustable hang tabs** allow the flexibility to compensate for a projecting soffit/jet work and are sold with two stainless steel eye bolts, washers, nuts and UV stabilized rubber washers to seal elements from entering the arm. Simply drill two holes at the desired eyebolt locations and the sign is ready to hang.

Pole Mount - Straight Arm Brackets

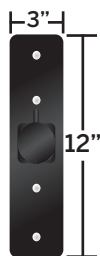

Special Notes:

- All steel brackets are powder coated textured black paint.
- Custom Steel Bracket work available - scaled drawing required for estimating.
- * Pole mount straight arm brackets can be mounted to walls.

Narrow SPINE (baseplate) specifically designed for pole mount applications.

Projection Stationary Brackets

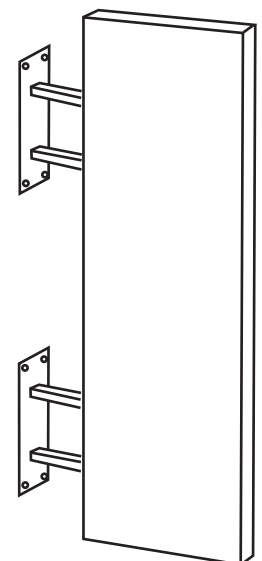

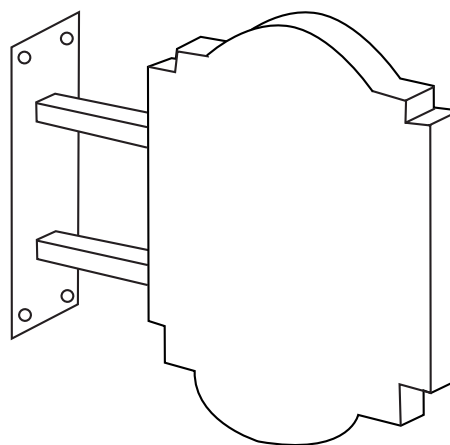

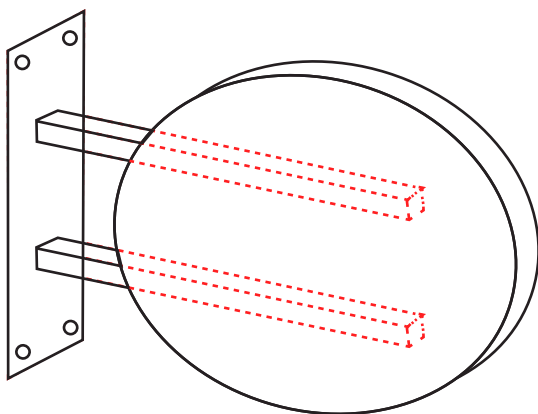

Projection stationary brackets are welded & pre-punched using the highest grade of 1/4" steel wall plate. Horizontal projection tubes are made of 1" x 1" x 1/8" heavy square steel with end caps for protection from moisture penetration. Each bracket is textured powder coated black for ultimate weather protection.

BRACKETS

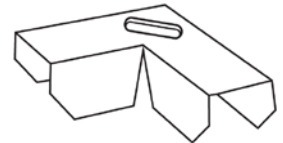

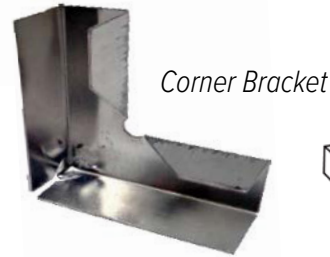

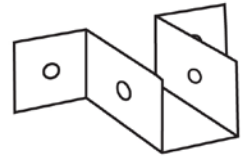

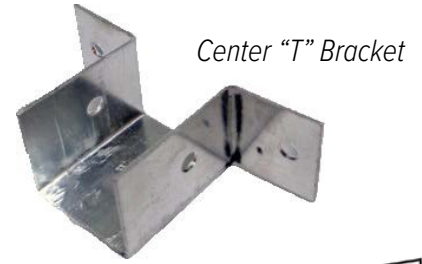

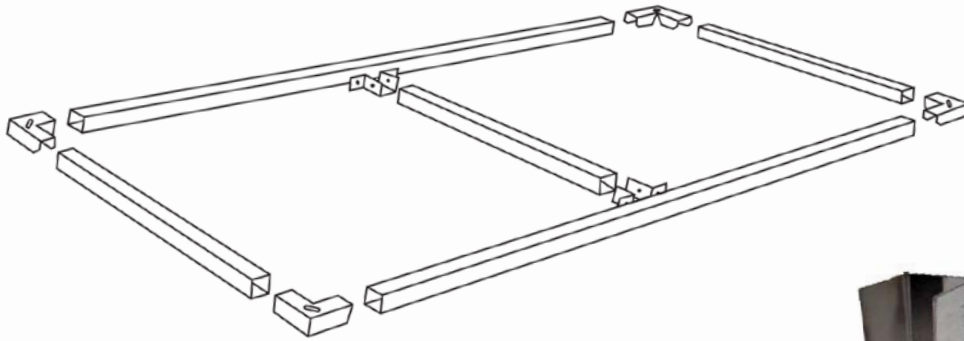

Aluminum Tube Frame Sign Brackets & Moldings

Fabricating Aluminum Commercial Signs

Assemble a 1" x 1" perimeter frame of aluminum tubing with corner brackets. For larger signs additional support can be obtained by installing tubing at intervals along the frame.

Install a pre-finished 040 aluminum face sheet in your choice of background color. You can then letter your copy or mount pressure sensitive graphics or drill the background sheet to mount plastic letters.

Install a pre-finished aluminum frame molding to complete the sign.

LETTERS & TRACK

Pronto Rigid Letter Set .080" Thickness

Pronto Changeable Copy Letters and Numbers Set is a cut above the traditional saw-cut changeable copy. Its patented acrylic panel design prevents scratches and its UV Inks have no harmful VOCs. It also has molded feet to keep panels from sticking within the track.

****Designed to be used with Pronto Track only!**

Flex Changeable Letter Sets - .030 Thickness

Flex Changeable Copy Letters and Numbers Set is a low-cost economical letter set. With its clear PVC backing, these letters are **not designed to be laid flat against surfaces. They must be bowed to allow wind to pass for expansion and contraction.** Flex Changeable Copy Letters and Numbers must be used in a well vented application. They cannot be used in a non-vented vandal-proof application due to the fact that they heat & warp.

****Designed to be used with Texas Track only!**

Don't Forget!

Texas Track (For Flex Letters - 7'6" - .040" Thickness)

This Letter Track holds Flex Changeable Copy Letters and Numbers Set onto any Sign. The Texas Track is made of Polycarbonate plastic with a length of 7'6" long (or 90 inches) and can be cut to the sign size you need. To attach you can drill a hole at the center of the track and use screws or rivets into your letter board. You can also use double-sided VHB tape to secure it as well as glue.

Sign Bases

Stable for high-winds, heavy traffic areas, schools, economical and pedestrian Friendly!

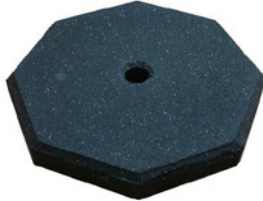

The rubber and steel sign bases are ideal for parking lots, crosswalks, guard booths, schools, malls, industrial and construction sites, or anywhere portable or where temporary signs are needed.

The 60lb. rubber base unit is stable enough to withstand high winds and bad weather, as well as heavy traffic areas. For excessive high wind areas there is also an optional 30 pound extender to add to our octagon bases creating additional stability. (Special Order Only.) The 30lb. rubber base & our 22lb. steel bases are ideal for indoor or light temporary use.

Carvagio HDU Blanks

Carvagio Sign Blanks are created for America's towns & historic districts. Carvagio blanks are pre-primed white single face and are manufactured from cast high density urethane. HDU will not rot, warp, crack or split even after prolonged outdoor exposure. For best results, use high quality latex or oil based paints as a top coat. All HDU blanks are sold without graphics and can be carved, routed & gold leafed. **ALL HDU blanks are SPECIAL ORDER only.**

Banner Stand Retractable Economy

The most economical retractable banner stand on the market. The Economy Retractable Banner Stand has a medium duty mechanism making it appropriate for temporary and full time displays or for advertising seasonal specials. This banner stand features a durable aluminum construction with a Black (**RU1332B-BLACK**) or Silver (**RU1332S**) finish. For easy storage, this economy banner stand and pole fold down into the base. When not in use, simply store the unit within the included bag to maintain the condition of the graphics and other components.

Pre Grommetted White Banner Material

The patented Bandanna Banner product is made from quality 14oz vinyl material and has thermo hemmed edges. The banners use a double grommet system with sets of 2 grommets spaced 3 inches apart. They also have a 'no-waste' system of grommets every 24 inches along the top and bottom of the banners. This system allows you to cut in between the two stainless steel grommets and not waste any material.

ALUPANEL Standard - 0.30mm Aluminum Composite Material

Manufactured by UK-based MultiPanel, AluPanel is an Aluminum Composite Material manufactured with two .012" aluminum faces sandwiching a solid polyethylene core. (Compare to Dibond) The result is a lightweight, rigid signboard -- and we think it's the best one available! Tough polyester paint finish -- ONE SIDE GLOSS and ONE SIDE MATTE! Extensive range of finishes including metallic and mirror finishes. Both sides are masked for protection from handling damage. All AluPanel sheeting is designed to be digital printed.

Integral (Smooth Hard Surface) PVC

Integral PVC IF is a chemically formed, light weight, rigid extruded sheet with a fine and homogeneous closed cell structure. It has a **smooth, glossy hard finish** on both sides and is non-corrosive making it suitable for both indoor and outdoor use.

Integral PVC IF is recommended for graphics applications including digital direct imaging, screen inks, lettering enamels, and vinyl graphics. Its great characteristics make it perfect for applications in many different industries, including construction, advertising, photographic, electrical, and more.

SKU	DESCRIPTION	SIZE
13MWT-INTEGRAL	White smooth hard surface PVC - 13mm	4' x 8' x ½"
19MWT-INTEGRAL	White smooth hard surface PVC - 19mm	4' x 8' x ¾"

Helpful Tip!

*Expanded PVC should be cleaned with isopropyl or denatured alcohol and wiped thoroughly in one direction. Human hands contain oils and acids that alter the characteristics of **ALL** substrates. Oils and acids can potentially affect adhesion of vinyls, inks and paints. All personnel that handles PVC sheeting should always wear clean cotton disposable gloves. *see page 101**

MULTIPANELUK[®] PVC

Multipanel PVC sheets are made using the free foam extrusion process. A lightweight brilliant white panel, they have a flat, smooth, uniform surface which gives optimum ink adhesion to produce vibrant, color-fast prints. Their rigidity, fine cell structure and smooth surface makes our PVC boards the preferred choice for professional printers, sign makers and exhibition contractors throughout the world. Designed for printing and other flat applications, Multipanel PVC offer outstanding reliability and performance creating excellent results time after time.

Features & Benefits:

- Masked on one side
- 550 & 600 Density
- Strong and Durable
- Anti-Bacterial
- Ultra White/Black
- Fire Resistant
- 100% Recyclable
- Anti-static Properties
- Weather and UV Stability
- Lightweight yet rigid
- Will not warp, delaminate, cup or twist
- Thermal and Sound Insulating
- Excellent for flat bed printing
- Can be used indoors or outdoors

Helpful Tip!

Chromatic Universal Acrylic Primer is a fantastic choice for priming Expanded PVC.

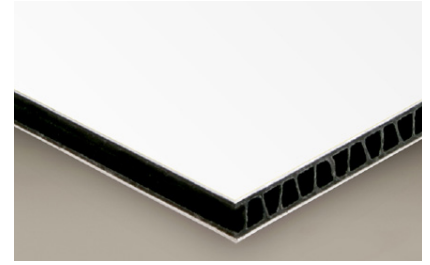

SUBSTRATES

ALUMINUM CORRUGATED POLYPROPYLENE

Single Face Aluminum - Corrugated Plastic Core

Econolite is a strong, aluminum composite panel with a high-density corrugated polyallomer (CPA) core that will not swell, corrode, rot, wick water, or delaminate even under prolonged water exposure. Econolite panels also feature a single-sided, finished surface of high-gloss factory baked polyester painted aluminum. Each panel is also backed with an unpainted aluminum sheet for added balance. The painted surface is warranted not to crack, chip, flake, or peel. Econolite panels are field-tested through extensive freeze/thaw cycling tests with no significant structural panel failure.

Features:

- Econolite has all the benefits of Alupalite but with only **1 finished aluminum side**; Alupalite has 2 finished sides
- Ideal for paints, digital inks (both UV or solvent cured), screen print inks, and pressure-sensitive vinyl

SKU	SIZE	COLOR
EL-WHT-C48YWGN	4' x 8' x 1/4"	White
EL-BLU-C48AAGN	4' x 8' x 1/4"	Blue
EL-BLK-C48BRGN	4' x 8' x 1/4"	Black
EL-GRN-C48CBGN	4' x 8' x 1/4"	Green

- Strong and lightweight
- Routs and cuts easily using standard carpentry tools
- Wind-resistant - when properly fastened between two post Econolite can withstand winds over 120 mph
- Weather-resistant with a "Class A" flame spread rating.
- The surface is formulated to resist outdoor dirt and is practically "self-cleaning".

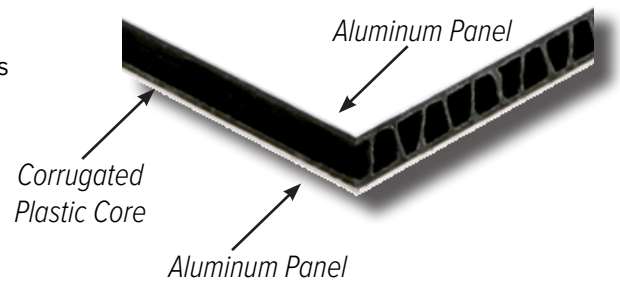

Alupalite

Alupalite is a strong, aluminum composite panel with a high-density corrugated polypropylene core that will not swell, corrode, rot, wick water, or delaminate even under prolonged water exposure. The factory-baked polyester painted aluminum faces add high gloss brilliance and rigidity and are warranted not to crack, chip, flake, or peel. Field-tested through extensive freeze/thaw cycling tests with no significant structural panel failure. Routs and cuts easily using standard carpentry tools; even bends around corners. Wind-resistant—when properly fastened between two posts, Alupalite can withstand winds over 120 mph Alupalite offers a colorfast 10 year limited warranty. It's ideal for paints, digital inks (both UV or solvent cured), screen print inks, and pressure-sensitive vinyl.

Recommended Applications:

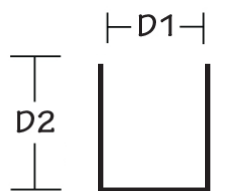

- General Signage • Architectural Signage • Digital Print • Post & Panel Signs
- Real Estate • Dimensional Letters / Cut-outs • POP Displays & Exhibits

outstanding performance in any environment. With Tuffak® SL and Tuffak SL Matte polycarbonate sign grade products, you can be confident your company image is secure.

Printable Polycarbonate Film Roll

This film is extremely versatile film used in broad range of applications: instrument panels, trade show displays, membrane switches, control panels and decals. They offer excellent light-diffusing characteristics, NON UV and chemical resistance and other proven properties. Typical applications are automotive, labels, control panels, membrane switches, nameplates, light diffusion, packaging and automotive interior decoration. Tuffak PC VM is available in various standard thicknesses from 0.005 to 0.030 (125 microns to 750 microns). The surface combination of Tuffak PC VM is one side velvet and one side matte.

Recommended Applications:

- General Signage • Marine • Displays • Instruments • Glazing • Automotive

DESCRIPTION	SKU	SIZE
Film Roll, Clear Velvet Matte	PCVM/25	48" x 25' x .020

General Purpose Polycarbonate Sheet

Solid Tuffak® GP sheets are clear, polished, UV-stabilized polycarbonate sheets. They offer extreme impact strength that exceeds the physical properties of other products of their class. Tuffak® sheets resist temperatures of -100 to +120 C, exhibit high optical clarity and have a good fire rating.

DESCRIPTION	SKU	SIZE
GP Polycarbonate Sheet, Clear	48/060/CLR/POLY	48" x 96" x .060"
GP Polycarbonate Sheet, Clear	48/080/CLR/POLY	48" x 96" x .080"

Vacuum Formed PAN Faces

Pan faces are formed with 10 year White or Clear TUFFAK sign grade Polycarbonate. Pan faces are an excellent alternative to standard flat faces. The face is vacuum formed to a depth of 2.25" which brings the surface further away from fluorescent lamps than a standard flat face. The added depth allows for better light diffusion and can sometimes eliminate hot and cold spots that are seen when lamps are mounted too close to a flat face. Pan faces are available in all standard sizes that range from 12"x24" to 48"x120". Larger sizes can be ordered as TWO PIECE. Custom sizes, radius corners and embossed pan faces are also available.

Scooter Board

Pre-finished Ready-to-Go Hardboard - Scooter Board is moisture resistant and weighs 1/3 less than high-density hardboards. It has a brilliant white finish that is stain resistant and tougher than roller-coated applied paints. Solid 1/2" core and is great for outdoor short-term signage. Vinyl and UV print receptive and is perfect for routing and cutting.

SKU	DESCRIPTION	SIZE
SB-48X96X1/2-UV	White/White	4' x 8' x 1/2"

Lusterboard

Lusterboard has a hardwood core and is composed of a premium, exterior furniture-grade plywood, featuring smooth, tight, sanded veneers for optimum surface beauty. Lusterboard has factory-baked polyester painted aluminum surfaces that covers both sides of the hardwood core, creating a smooth, glossy finish. Lusterboard is great for Cut-Outs, Billboards, Scoreboards and much more! Light, yet rigid construction, allowing for easier handling and installation. Lusterboard's surface is warranted not to fade, flake, or peel. Easy to fabricate with standard carpentry tools.

SKU	DESCRIPTION	SIZE
LB-H48BWBW	Lusterboard - White	4' x 8' x 1/2"
LB-H40BWBW	Lusterboard - White	4' x 10' x 1/2"

MDO (Medium Density Overlay)

Plum Creek MDO 2 step process overlaid, hardwood faced plywood with tight core for superb machinability and weatherability.

Features & Benefits:

- Tightly laid core for excellent machinability
- High strength, light weight
- Excellent for flat signage and cut out letters
- Long term smooth surface for paint and coatings
- Very low formaldehyde

Treated Wood Composite Panel

Can be routed, carved or sandblasted.

Tough and Revolutionary Performance in Exterior Environments! Sanded two sides (S2S) for a smooth, unprimed surface. Moisture, rot and termite resistant. No added urea formaldehyde; made from sustainable materials. One piece solid substrate - not laminated. Moisture resistant: As measured by ASTM D1037 for water absorption and thickness swelling. Rot resistant: As measured by AWP A E-16 Field Test for Evaluation of Wood Preservatives To Be Used Out of Ground Contact: Horizontal Lap-Joint Method. Termite resistant: As measured by AWP A E-7 Standard Method of Evaluating Wood Preservatives by Field Tests with Stakes. 5-year limited warranty!

High Density Urethane Sheeting

Discover SignFoam4, the ultimate artist's sign board for dimensional signage and displays. Available in 15lb. and 18lb densities, this next-generation material provides the crisp, clean edges and detailed definition that you demand – plus so much more. Its advanced microcell technology produces an exceptionally fine, grain-free surface that minimizes sanding, and greatly reduces priming, painting and finishing time. Imagine, ultra-smooth painted finishes with fewer coats and less process labor. SignFoam4's tough-yet-refined cell structure accommodates virtually any design you envision, whether milled by machine, carved by hand, or sandblasted. It's a superb board for CNC-machining finely detailed designs and lettering, and nearly invisible surface textures. The advantages of SignFoam4's tighter microcell texture include:

- Boards that are easier to machine
- Faster, more precise hand carving
- Crisper, cleaner, stronger edges
- Less filling, sanding, priming and painting
- Finer, more intricate 3-D details
- Greater endurance in outdoor applications
- Excellent small-shape durability
- Wood-like shavings vs. dust when machining
- Ultra-smooth surfaces with less work

Magnetics**

Magnetic Sheeting

All ProMAG® Magnetic Sheeting is available in standard magnetic strength. Our magnetic sheeting can be magnetized single sided or double sided for thickness above .030". This high-quality magnetic material can be coiled to a 1/2" (12.7 mm) radius without cracking at 68 F. The performance range for temperature is -15 F to 160 F (-26 C to 71 C). With thicknesses ranging from .015" to .060", the wide range of thicknesses available in ProMAG magnetic sheet can be your competitive edge. ProMAG is available with several colored vinyl laminates: Matte white, black, blue, yellow, gloss white, red and green. ProMAG is available in both rolls and sheets. ProMAG magnetic sheeting is magnetized with equally spaced magnetic poles running parallel to the length of the rolls.

SKU	DESCRIPTION	SIZE
25AFG028243701	Printable Roll - White	24" X 25' X 0.30mil
50AFG028243701	Printable Roll - White	24" X 50' X 0.30mil

Helpful Tip!

- To guard against moisture and dirt buildup between the magnet and the metal surface (particularly on outdoor applications), remove the magnet at regular intervals.
- Clean both the magnet and metal surface with mild detergent; wipe with a soft cloth or allow to air-dry. (For vehicle-mounted signs, remove and clean DAILY.)
- After waxing and polishing, allow 2 days for wax to cure before applying magnets.

Showcard

The industry standard for rigid laminated SBS display board. It is often used for retail signage and displays. Offering superior flatness, high rigidity and excellent printing and converting properties. Consistent quality and solid bright white appearance on both sides makes it an excellent choice for high quality applications. The super smooth clay coating can be directly screen, offset or digitally printed. The solid white core makes it an ideal choice for digital printing, die cutting or photo mounting.

Blue Economy Squeegee

Our lowest cost squeegee is made from a long-lasting polyblend — not too stiff and not too soft. The perfect squeegee to supply with customer installed vinyl. Replace your squeegees often for bubble free applications!

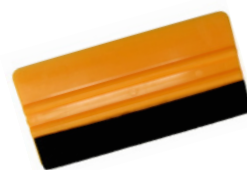

SKU	SIZE
SQUEEGEE/BLUE	2 ¾" x 4"

6" Plastic Squeegee with Felt

Standard-weight felt edge wrapped squeegees. Helps protect vinyl from marring and scratching. Saves time and money by eliminating the need to "wrap" a squeegee, or using a pre-mask.

SKU	SIZE
SQFLT6	3" x 6"

3M Gold Squeegee

The Professional's Choice. The 3M Gold Squeegee is a stiff vinyl/nylon construction with a reinforced edge for a bubble-free application. Lasts the longest!

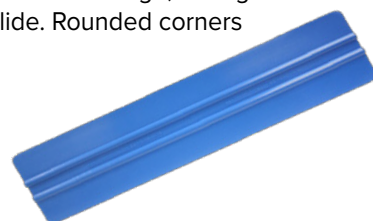

SKU	SIZE
SQUEEGEE/GLD	2 ¾" x 4"

12" Plastic Squeegee

Ideal for vinyl, film, graphics, tape, silk screen, and pressure-sensitive applications. Featuring high-stability ribbed profile with radial corners in a poly-flow blend. Twin ribs for easy handling and pressure control. With a true edge, strong memory, medium flex and high glide. Rounded corners based on industry standards.

SKU	SIZE
SQ12	2 7/8" x 12"

Felt Squeegee (Rectangular)

Our solid felt rectangular squeegees are a must for working with digital prints and vehicle wrap applications. Manufactured from a soft yet firm felt.

SKU	SIZE
SQUEEGEE/FELT	2 ¾" x 4"

Squeegee Sharpener

The squeegee sharpening tool smooths the rough edges and nicks that your hard cards develop over time. The squeegee sharpening tool will help your hard cards last longer. With one or two strokes your squeegee edge is restored to the same condition as when it was first used.

SKU	SIZE
SQSHARP	1 3/8" x 3 1/8"

White Oracal Teflon Squeegee

When You're Ready to "Snap" the Blade

When using a pair of pliers, advance the blade out so the perforation is past the back support wall located on the back of the knife. The support wall exists so the blade doesn't break mid-cut, but to snap, the blade must go past it. Use the pliers to grasp the blade firmly and snap along the perforation.

Craft Knife - Natural Silver or Prosure Grip

Compare to X-Acto knives. Takes #11 blades. Comes with (1) blade and protective cover.

EZ Gripper Wide Media and Vinyl Handling Tool

The E.Z. Gripper Wide Media Installation Tool™ maintains even tension of the media to reduce potential creases and avoid accidental folding and flopping of media edges. It handles wide materials on both horizontal and vertical installations and applies and controls media with or without pre-masking. One-person control on wider pieces of vinyl. Prevents ends and edges from folding or flopping. Evens tension on media and lessens potential creases. Applies & controls media with or without pre-masking.

Mondo Raxx Jumbo Wall Media Storage

The Jumbo Mondo RAXX is a ten-roll capacity large format media rack that holds 50 yard rolls of vinyl, print media, paint replacement film, banner media and more. Jumbo Mondo RAXX are made from heavy-duty stamped aluminum.

*****Only vertical racks included. Desired poles purchased separately*****

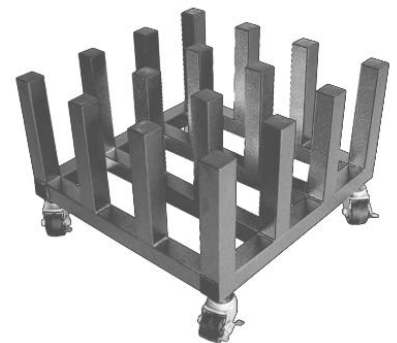

SKU	SIZE
MJ1000	Adjustable

Heavy Duty Mobile Floor Rack - 3" Core

Holds 3 inch core rolls of media, vinyl, inkjet film, paper, banner material, etc. The oversized wheels on this rack enable it to move easily even when loaded up with heavy material. Accommodates larger core size rolls and holds 25% more than 12 slot rack. Holds 1000 lbs. Dimensions: 17" High x 24" Wide x 25" Deep

SKU	SIZE
MR16	17" x 24" x 25"

Chrome Plated Wall Mount Material Rack

Heavy gauge wire constructed rack holds sixteen (16) rolls of 3" core diameter material without using valuable floor space. This rack is durable enough to hold even up to 16 rolls of 30" x 50 yds material with ease. Proper storage of pressure sensitive materials dictate supporting rolls by the core to avoid adhesive activation. Included are adjustable screw mounting clips, allowing alignment with studs in most walls. Holds up to 30" x 50 yds material.

SKU	SIZE
WR-1600	22" x 28"

Helpful Tip!

Extreme pressure on any surface of a roll will result in surface marring (Mottling). This is usually caused by stacking multiple rolls on top of one another for a long period of time.

One storage tip is to keep rolls stored vertically instead of horizontally.

Grafix Gone Adhesive Remover - Quart

GRAFIX GONE® softens adhesive residue for removal within 90 seconds on most surfaces. Spot test on new paint before using. It will not burn most plastics and will not harm latex paint. No extra cleanup after removing adhesive residue. Smells good, works great & safe to ship.

Great for removing old paper sheeting from plastics.

Use on:

Vinyl Banners • Plexiglas™ • Styrofoam™ • Lexan™ • Styrene • Glass • Painted Surfaces

Chromatic Metal and Wood Primer White

Metal and Wood Primer White is a fast drying high opacity primer with good adhesive qualities on both wood and steel. A coarser pigment particle offers the system greater “tooth” than PBOW Block Out White and PMPW Masonite Primer White. Metal and wood primer sands easily. It is also good for use as a primer-burnishing sealer under gold sizes and may be slightly tinted.

SKU	SIZE
PMWPW-GAL	Gallon

Chromatic Block-Out White Primer

Block Out White (PBOW) is a fast drying, high opacity coating that is used to “block out” previous painted sign faces and cover uneven colors of substrates. It is also used to prime new MDO surfaces and is readily sanded. Because of its exceptionally fast dry time, this product is most often used in production environments. Popular in high, and rapid production environments due to its fast drying times, generally drying to a dead flat finish in about 2 hours.

SKU	SIZE
PBOW	Gallon

Chromatic White Universal Waterbase Primer

A waterborne high performance acrylic primer that’s suitable for use on metal, wood, HDU, PVC and most masonry applications. Has excellent adhesion qualities. Easy to apply and sand. Can topcoat within 3 hours.

SKU	SIZE
WP1008-GAL	Gallon

Jay Cooke’s Paint Primer All Purpose

Jay Cooke’s All Purpose Sign Primer is the industry leading high build, water-based, universal primer, sealer and stain blocker. It contains fast dry convenience with outstanding adhesion, build and sealing capabilities, and can be used for both interior and exterior applications and can be used with both latex and enamel topcoats. When used as a primer/sealer on new wood, it provides excellent tooth for surface coatings and will not cause excessive grain raising. It is absent of harmful solvents, it is low odor and requires only water clean-up. Jay Cooke’s All Purpose Sign Primer fills the need of both the commercial shop and dimensional sign maker. It is formulated so only one primer is needed for wood, foam, MDO plywood, fiberboard, vinyl or metal.

Gold Size Fast and Slow Set

This size is a clear gilder's varnish designed for fast leaf work. It may also be used as a clear protective top coat over leaf, lettering and other decorative work. Luco Quick Dry Gold Size will be ready for gilding in 1 to 3 hours, depending upon temperature and humidity. The Luco Slow Set Gold Size is a Gilder's Oil designed for all leaf work where extended tack time is allowed, greater brilliance is desired and a clear protective top coat is not necessary. Luco Slow Set Gilder's Oil will be ready for gilding in 10 to 12 hours, depending upon temperature and humidity. This tack will hold up to 24 hours.

SKU	DESCRIPTION	SIZE
L17415-1/2PT	Fast (1-3 Hours)	½ Pint
L19415-1/2PT	Slow (10-12 Hours)	½ Pint

Gold Leaf

Patent Gold Leaf, also referred as Transfer Leaf, is a gold leaf mounted to special tissue paper by a pressure process. This allows the gilder to remove one leaf at a time without disturbing the remaining leaves. The leaf will stay on the tissue until it is pressed onto a prepared surface and the tissue backing is removed. Standard size of each sheet is 3-½" x 3-½". A book will cover approximately 1 ½ Square Feet. A pack/box of 20 books will cover approximately 30 Square Feet.

SKU	SIZE
PAT-L76PT23-BK	3 ½" x 3 ½"

Gold Leaf

Loose Leaves are placed between pages in a book made from specialty tissue paper. The leaves are barely held in place by the paper and will come loose with a light puff of air. Loose Leaf is generally preferred by professional guilders when working indoors the leaf is easily moved and applied using a guilders tip brush. Standard size of each sheet is 3-½" x 3-½". A book will cover approximately 1 ½ Square Feet. A pack/box of 20 books will cover approximately 30 Square Feet.

1-Shot Solvent Hardener 4007

1-Shot's Hardener is designed to accelerate drying times for lettering enamels, bulletin colors, and pearlescent enamels. 1-Shot Hardener will extend color life, increase gloss, and improve adhesion to most substrates. Adding 1-Shot Hardener to paint will also aid in preventing "lifting" when over coating with an automotive-style clear coat system.

Shelf Life: Unopened: 48 Months Opened: 12 months

SKU	SIZE
4007	Pint

1-Shot Brush Conditioner & Cleaner

A premium brush cleaner designed to not only thoroughly clean oil based paints from quality, natural hair brushes, but to do so without damaging the hair of the brush. Unlike harsh spirits and reducers, this product conditions, and softens the brush and can even be used to restore partially hardened natural & nylon brushes; all without interfering with the properties of oil based sign paints.

Shelf Life: Unopened: 48 Months Opened: 12 months

SIGN HERO 360

DOUBLE-SIDED LED SIGN TUBE

DIRECT DRIVE TECHNOLOGY NO POWER SUPPLIES NEEDED!

Introducing Keystone's 360° LED Sign Tube: The easiest LED installation

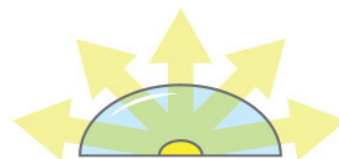

A perfect solution for retrofits or new sign installations. **With revolutionary DirectDrive technology there's no need for an external driver or ballast, saving precious labor time and costs.** Maintenance professionals install the 360° LED Sign Tube in five minutes or less!

6" Depth from face to lamp - 12" standard spacing
Quick and easy installation

Our DirectDrive technology eliminates the need for an external driver or ballast while still using existing sockets. This saves time and hassle for field technicians.

Consistent lighting

We've added optical lenses to cover each individual LED chip in the tube, which eliminates hot spots and ensures consistent light distribution across both faces of the sign.

**Wide light distribution = No shadowing
No hotspots**

Flexible for your needs

We've provided a rotatable R17D end cap that swivels, ensuring that the tube can be adjusted to provide a light beam in any direction.

Built to last

Count on Keystone for a tube with a **50,000 hour lifetime and a 5 year warranty.** Heavy duty aluminum heatsink ensures LEDs run cooler for longer. Plastic and aluminum construction ensures less breakage.

**See additional information
on the following page**

**For installation video visit
keystonetech.com/video**

**ROTATABLE
CASE
R17D**

**Standard 6 lamp, 8' sign with magnetic ballast*

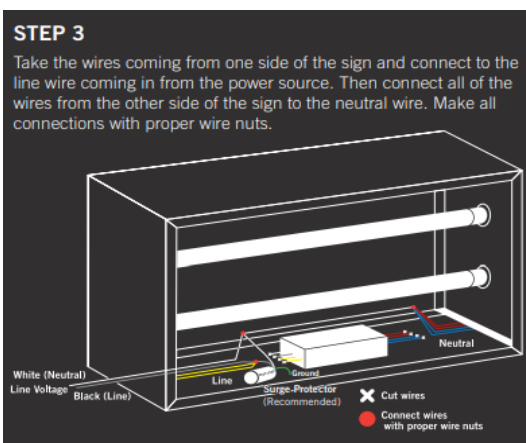

Double Face Lamps Available for All Size Sign Cabinets

The 360° LED Sign Tube is available in all of the lamp lengths typically used to replace T8HO & T12HO fluorescent lamps, including:

Skyline Rigid Border Tubing

Installation hardware included, but not attached.

Call for Availability & Pricing on Standard Premade Lengths & Sizes!

Standard Colors:

Red - Yellow - Lemon - Orange
Cool White - Blue - Green

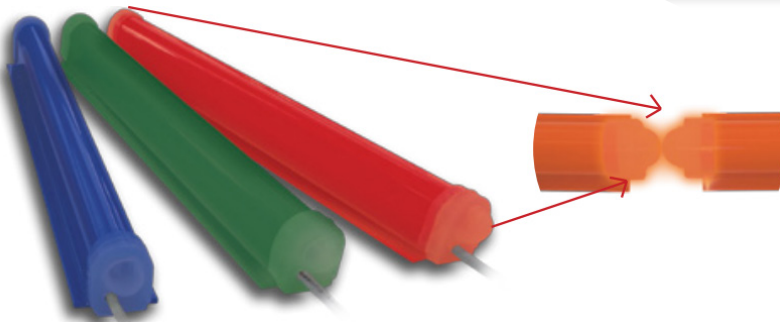

Allanson's LED SkyLine Rigid Border Tubing provides top of the line LED systems that complement and enhance the appearance of your building.

With superior accent lighting, the sky's the limit!

- Seven standard colors (custom colors upon request*)
- RGB SkyLine also available for color changing effects
- Balanced even illumination - no dead spots
- Non-bendable, UV resistant polycarbonate housing
- Sturdy stainless steel snap clip and aluminum slide attachments for easy mounting
- Dimmable (LED Dimmer ACL-12/24V- DMR)
- Standard and custom lengths available
- 5 year standard warranty
- 24 VDC System
- Field Cutting Kit (#ARBT-CUTKIT) only available for seven standard colors to assist with on site adjustments
- Clean connection - wires are securely & effectively retained behind tubing
- UL & CUL listed outdoor & indoor wet, damp, & dry location
- Operating temperature: -40°C to 70°C
- White is 6000K, 122 Lumens per foot
- Uses Allanson CVW243-MV (waterproof) or CV244-120-277 Power Supplies
- IP 67 rated

End caps allow for thermal expansion and contraction and provide uniform illumination from end to end for a clean and sleek look.

LED

RGB3 SYSTEM MODULE FOR CHANNEL LETTERS

RGB3 System

Has predetermined programs to select from to meet your needs. Cannot be changed or customized.

- Tricolor emitter is brighter and more efficient
- Pre-set programs
- Time delayed program capability
- DMX programming and signal capability
- Maximized sign awareness in any environment
- 3 larger light sources versus 9 individual point sources
- Fewer power supplies required to light the same sign
- We can pre-program the system to your specifications
- You can easily program the system in your facility
- Program on site using Allanson's exclusive design software

Packaging

Single Unit (Various Size)	25
Bulk Packaging	600

2,940 Allanson RGB DMX Modules were installed in the Argosy sign.

Allanson RGB DMX Modules can be programmed to allow each letter to change a different color, all letters to change the same color at the same time, colors to fade from one letter to the next, colors to change in reverse, or flash if desired.

One of the color schemes currently programmed allows Argosy to display the colors of the American Flag. Each Argosy letter goes through a sequence where they change from blue to red to white and then back again.

DMX & WiFi Controllers - *For RGB Skyline & RGB3 System*

Master Controllers

ACL-PPMC-DMX

- Pre-programmed DMX Master Controller
- 16 sub-controller capability RGB Pre-Programmable Master Controller
- 32 preset programs available
- Microphone for sound control
- Speed and intensity can be adjusted
- Develop your own color with 255 level of each red, green, and blue
- Maximum distance from DMX master controller to sub-controller is 200 ft
- Dimensions: 3.82" L x 2.36" W x 1.57" H

ACL-MC-DMX

- DMX Master Controller
- 512 Channel, 170 sub-controller capability ACL-MC-DMX
- Links sub-controllers together
- Multiple signs can be addressed individually
- Stores up to 32 user defined programs
- Uses DMX 512 protocol signal via XLR interface
- USB programming interface
- Can be powered by 120 Volt AC adapter (included) or USB port (optional)
- Day, hour and minute time setting capability
- 120 Volt AC power adapter included
- Speed, fade and strobe adjustable
- Maximum distance from DMX master controller to sub-controller is 200 ft
- Dimensions: 7.125" L x 4.75" W x 1.56" H

Sub-Controllers

ACL-SCD120-DMX

- Runs up to 75 modules of RGB3 DMX System or 12 ft of RGB SkyLine Rigid Border Tubing
- Uses economical 12 VDC or 24 VDC Class 2 power supplies
- 5 built in dip switch preset programs
- Operates independently or as part of system
- Dimensions: 4.06" L x 2.625" W x 1.125" H

WiFi Controller

ACL-WIFI-103

- Controls up to 75 modules of RGB3 System or 12 ft of RGB SkyLine Rigid Border Tubing
- Power Amplifier ACL-3063-3A can control an extra 75 modules per unit or extra 12w ft of RGB SkyLine Rigid Border Tubing with the same lighting effects
- Stand-alone Non-DMX system
- Maximum WiFi control distance is 320 ft using the smart phone app
- Numerous variables/interferences may influence wireless distance
- Max RF transmission distance is 95 ft line of sight via remote control
- 32 preset programs and 9 user defined colors via remote control
- Remote control sold separately
- Dimensions: 5.02" L x 2.87" W x 1.75" H

ALL ITEMS LISTED ARE SPECIAL ORDER ONLY.

Controllers - **For RGB ADDRESSABLE**

Addressable Controller (ACL-ADC-SPI)

- Enormous capability of controlling up to 21000 modules
- 14 Programs can be stored with SD card
- Day, hour, and minute time setting capability
- Operates independently without sub controller
- Maximum distance from controller to first module or between modules is 60 ft
- 120 Volt AC power adapter, channel adapters, jumper cables, and SD card and SD card reader included
- Dimensions: 7.75" L x 4.72" W x 1.85" H

DMX Master Controller (ACL-MC-DMX) AND Signal Converter from DMX to SPI (ACL-DMXSPI)

- Capability of controlling up to 170 modules
- Stores up to 32 user defined programs
- Day, hour, and minute time setting capability
- DMX 512 protocol signal via XLR interface
- Speed, fade, and strobe adjustable
- USB programming interface
- Can be powered by 120 Volt AC adapter (included) or USB port (optional)
- Maximum distance from converter to first module or between modules is 60 ft
- Maximum distance from DMX master controller to converter is 200 ft
- **Dimensions (A): 6.89" L x 2.05" W x 1.30" H**
- **Dimensions (B): 7.13" L x 4.75" W x 1.56" H**

Addressable Pre-Programmed Controller (ACL-ADPPC)

- Controls from 8 to 360 modules
- 16 Preset Programs
- Adjust speed, direction and fade
- Compact size
- Speed, direction, fade, and strobe are adjustable
- Maximum RF transmission distance is 130 ft line of sight
- Wireless remote and 120 Volt AC power adapter included
- Maximum distance from controller to first module or between modules is 60 ft
- Dimensions: 5.30" L x 1.18" W x 0.79" H

ALL ITEMS LISTED ARE SPECIAL ORDER ONLY.

ACCESSORIES

Note: signal cable(CAT-5) not supplied.

RGB Signal Booster (ACL-RGB-CATV-BOOSTER)*

- Boosts the DMX signal and extra 400 ft when used with the Allanson Signal Cable for an extra 200 ft when used with the CAT5 Cable

Dimensions: 5.25"L x 2.75"W x 2"H

DMX512/Network Converter (ACL-ARTNET-DMX)*

- Sending DMX signal over IP networks
- Can be configured in two ways: DMX512 to Network or Network to DMX512

Dimensions: 7.80"L x 3.07"W x 1.97"H

DMX512/Network Converter (ACL-ARTNET-OPENID)*

- Safe as ACL-ARTNET-DMX, except open IP range configuration

Dimensions: 5.12"L x 2.36"W x 1.58"H

SPI Signal Amplifier and Splitter (ACL-SPI-SA)

- Extends the SPI signal distance an extra 100 ft when used with the Allanson Signal Cable or an extra 60 ft when used with the CAT5 cable

Dimensions: 4"L x 1.25"W x 1.25"H

Power Amplifier (ACL-3063-3A)

- IP68 Waterproof
- Constant Voltage power amplifier
- Duplicates RGB signal
- Multiple amplifiers can be used

Dimensions: 6.42"L x 1.38"W x 1.10"H

Signal Cable (ACL-DMX-CBL-100)

- Shielded 3 wire signal cable
- 100 ft per spool

ACCESSORIES FOR WIRELESS

Note: Numerous variables/interferences may influence wireless distance.

WIRELESS OPTIONS BETWEEN CONTROLLERS

DMX Wireless Kit (ACL-DMX-WLS)*

- Wireless DMX signal transmitter and receiver with 3 pin XLR connector
- Max 320 ft wifi signal range for open area

DMX Wireless Receiver (ACL-DMX-WLS-RECEIVER)*

- Wireless DMX signal receiver works with ACL-DMX-WLS transmitter
- Multiple receivers can be used with one transmitter

WIRELESS OPTIONS BETWEEN MODULES

PWM RF Transmitter (ACL-WT3050)*

- 2.4 GHz working frequency
- Max wireless distance is 320 ft open area

Dimensions: 7"L x 2.20"W x 1.22"H

PWM RF Receiver (ACL-WR3053-5A)*

- Multiple receivers can be used to sync with one transmitter
- 2.4 GHz working frequency
- Max wireless distance is 320 ft open area

Dimensions: 7"L x 2.20"W x 1.22"H

WIRELESS OPTIONS FOR ACL-WIFI-103

Remote Control for ACL-WIFI-103 (ACL-T3-RC)*

- Full color touch panel
- RF transmission distance is 95 ft line of sight
- 32 preset programs & 9 user defined colors

Dimensions: 6.61"L x 3.78"W x 1.34"H

Constant Voltage Receiving Controller for ACL-WIFI-103 (ACL-DMX-WLS-RECEIVER)*

- Wireless receiver with built-in antenna
- Max wireless distance is 200 ft open area

Dimensions: 7"L x 1.90"W x 1.30"H

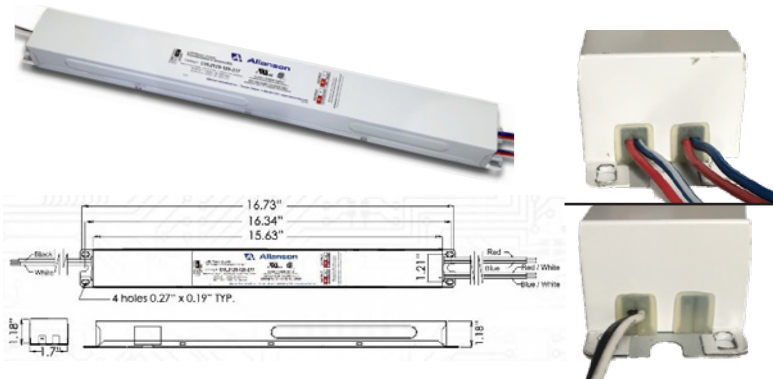

ALL ITEMS LISTED ARE SPECIAL ORDER ONLY.

*NON WEATHERPROOF

Allanson Power Supply

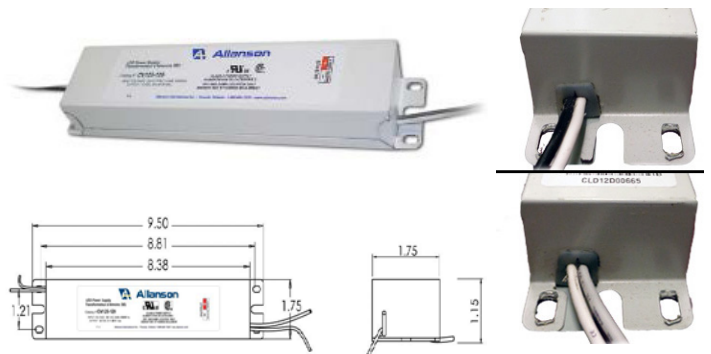

A CVL2125-120-227

Dry & Damp Location WITHOUT NPT Threaded Nipple/Coupling

Universal Power Supply 60W/120-277VWT

Dry, Damp & Wet Location WITH 1/2" NPT Female Thread at Both Ends

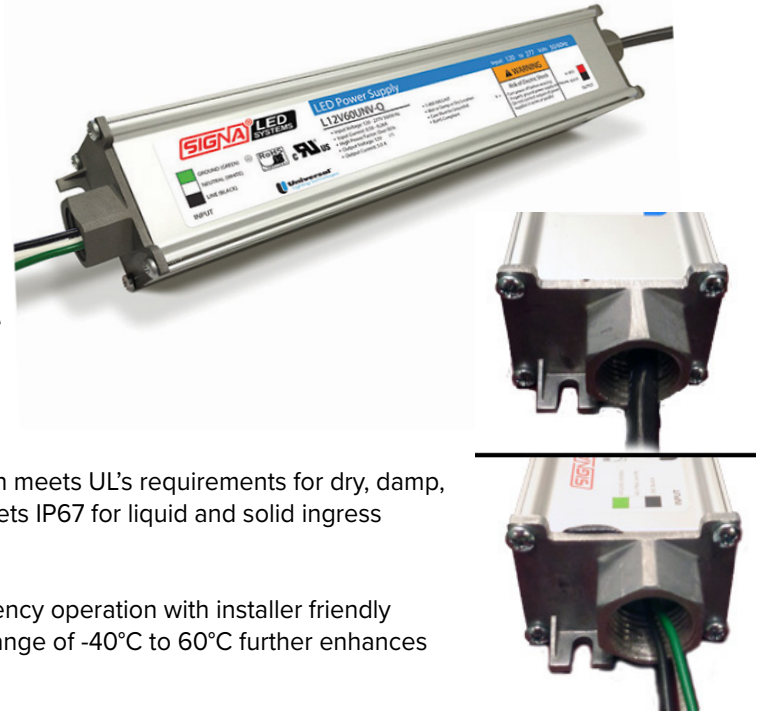

Universal's new Q-Can driver is designed to simplify installation and provide long dependable life in tough applications. The 12V LED driver with a 60W class 2 output is designed specifically for demanding outdoor signage applications.

The Q-Can comes with threaded adapters that allow connection to junction boxes either directly with couplers or through sections of conduit. This keeps all the electrical connections enclosed to comply with code requirements and eliminates the need for additional enclosures. The jacketed 60" output cable provides additional installation and application flexibility.

With its corrosion resistant aluminum housing, the Q-Can meets UL's requirements for dry, damp, and wet location ratings. Additionally this LED driver meets IP67 for liquid and solid ingress protection.

The LED driver performance features include high efficiency operation with installer friendly universal input voltage. A wide operating temperature range of -40°C to 60°C further enhances the Q-Can's application flexibility.

For maximum installation simplicity, application flexibility, and long reliable operation, look to the Signa Q-Can LED Driver.

SKU: L12V60UNV-Q

Physical

Input Current Amps	0.58A/0.26A
Output Volts	12
Output Current	5.0
Output Watts	60
Location	Dry, Damp & Wet

Helpful Tip!

The lower the load on the LED Power Supplies, the longer they will last.

Always load LED Modules to the recommended manufacturer's power supply loading chart or do the math....

Example: 10 LED Modules

@ MOD Wattage: 1.08 per

= 10.8

+ 15% cushion = 1.62

= 12.42

In this instance, your final value is 12.42 putting you slightly over a 12 watt power supply (not offered) so a 20 watt power supply or larger would be necessary.

JS LED Power Supply

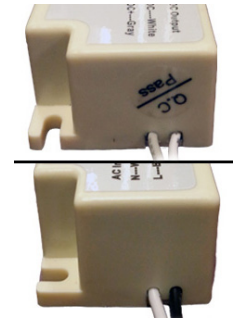

Applications

- Outdoor Signage
- LED Channel Letters
- Damp, Wet & Dry Locations

A **MJ-1220**

Waterproof WITHOUT NPT Threaded Nipple/Coupling

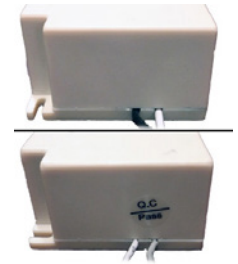

- 20 Watts Output, Constant Voltage or Constant Current
- Suitable in standard electrical junction boxes
- Waterproof Design within a 2x4 J Box, IP66, NEMA4,
- Convection Cooled, Plastic Housing, Dry or Damp Rated
- UL(cUL)1310, UL(cUL)48Class 2, FCC, CE Approved
- 3 Year Warranty

B **MJ-1240**

Waterproof WITHOUT NPT Threaded Nipple/Coupling

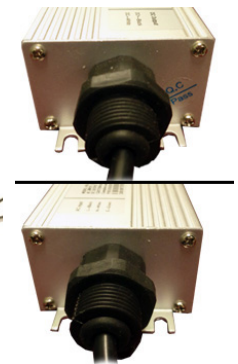

- UL8750, UL60950, LED Driver
- 40 Watts Output, Constant Voltage
- Water Protection (IP67)
- Convection Cooled, Aluminum Housing
- 100% full load burn-in test
- Class 2 Power Supply
- Protections: With OCP, OVP, SCP Protection & Auto Recovery
- 5 Years Warranty

C **MJ-1260-100-277**

Wet Location WITH 1/2" NPT Male Thread at Both Ends

- 60 Watts Output, Constant Voltage or Constant Current
- Suitable for Dry, Damp, or Wet with proper terminations
- Waterproof Design, PFC
- Convection Cooled, Aluminum Housing
- UL1310, Class 2 output Certified
- With OCP, OVP, SCP Protection and Auto Recovery
- 3 Years Warranty

Keystone LED Power Supply

Constant Voltage LED Pocket Drivers

- Small size without compromising performance
- Minimal shadowing
- Fits into a wide range of applications
- High power factor
- Multivolt input (120V/277V)
- Lightweight and easy to store
- Rigid aluminum case

The pocket driver packs a 60 or 100 watt punch despite being ¼ the size of a conventional driver!

ACCURATE MEASUREMENTS

Helpful Tip!

Overheating and Water Damage are two of the biggest causes of premature failure. Power Supplies should never be mounted at the bottom of an exterior sign where moisture is present. Even a weather sealed module or power supply requires adequate spacing and ventilation to dissipate heat build up. Power Supplies should always be mounted vertically on interior sides of exterior signage whenever possible.

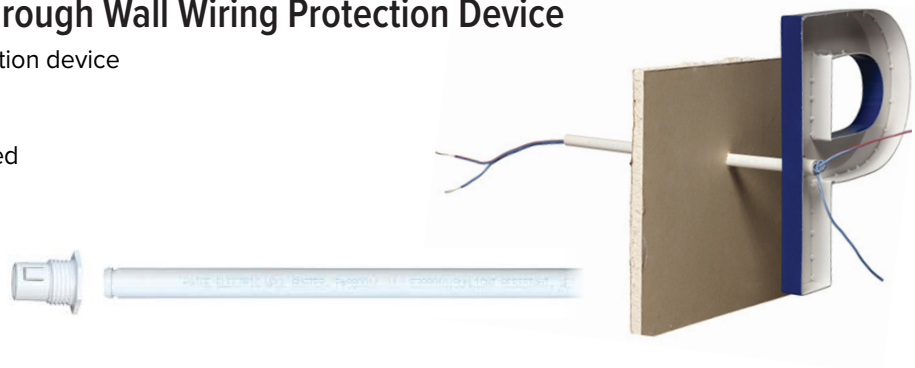

Allanson Stormtight LED Dimmer

- Manual 0 - 100% brightness adjustment
- Compatible with all 12V and 24V Constant Voltage DC power supplies
- Eliminates current surges and maintains the life of LED's
- Can dim up to 5 Amp load (CV125-120)
- 12V and 24V LED modules can be dimmed by using this dimmer
- Convenient 4 wire plug in terminal block
- Simple one piece design

WallBuster LED Two-Part Through Wall Wiring Protection Device

- Two-part through wall wiring protection device
- Designed for LED channel letters
- Snap fit takes seconds
- 9/16 inch holes are all that is required
- No sharp metal edges in contact with insulated conductors
- UL Listed

SKU

98P0014

Paige Power Supply Box LED Power Supply Box UL listed for Wet, Damp & Dry Locations!

- **Material** - 22 ga. Galvanized 2 piece box
- **Inside Dimensions**- 11.5" Tall x 7" Wide x 3" Depth
- **Lower Shelf** -Seven pre-punched knock-outs. One pre-drilled hole for ground lug
- **Inner Back Panel** - Raise for attachment of power source without damaging the integrity of the box back
- **Top of Sides and Bottom** - Pre-punched with air and condensation relief holes
- **Front Cover** - Fastening holes centered so attachment can be made either direction
- **Power Source Usage** -Will accommodate one or two standard size LED power sources. For power sources requiring 4" parallel clearance - Power sources must be mounted to sides

SKU

980054C

Paige Rip Strip: LED Plenum Wire **WITHOUT** Ground

This Cable consists of 2 conductor, 18 AWG stranded tinned copper conductor insulated with a Blue Polyvinyl Chloride jacket overall. **Plenum** UL Listed for sunlight resistant applications.

USE: A 2-18 AWG conductor LED WIRE for connecting low voltage DC power sources to LED modules. Can be used indoors or outdoors. *Available in 500 ft Spools.

SKU

98P183L-500'

Paige Plus: LED Wire Jacketed **WITHOUT** Ground

This Cable consists of 2 conductor, 18 AWG stranded tinned copper conductor insulated with Polyvinyl Chloride and a Polyvinyl Chloride jacket overall. UL listed sunlight resistant applications.

USE: A 2-18 AWG Conductor PLTC Cable for connecting low voltage DC power sources to LED modules. Can be used indoors or outdoors. *Available in 250 ft Spools.

SKU

984182C-250'

Helpful Tip!

Distance & Placement of power supply is extremely critical.

The importance of voltage drop for LED lighting is that an LED requires a minimum amount of current to properly light. Less than the minimum current can cause an LED to flicker, operate with less lumen output or shift in color.

Suggested LED to Power Supply Wire Gauge Chart

Expect a 3-5% Voltage Drop

12V VOLTAGE DROP AND WIRE LENGTH DISTANCE CHART

Wire Gauge	10W / .83A	20W / 1.67A	30W / 2.5A	40W / 3.33A	50W / 4.17A	60W / 5A

Fluorescent High Output Lamp Holders

Fluorescent High Output Lamp Holders provide excellent and durable housing for your fluorescent bulbs.

Features:

- 12" lead length
- Special thermoplastic flexible sealing material
- Expands and contracts with temperature changes
- Electrical connection protected from moisture
- Self extinguishing sealer adhesive
- Will not crack or deteriorate like clay-based sealers
- Electrical contacts remain rigid when expanded
- Electrical contact with lamp remains strong even after hundreds of relampings

Sylvania High Output Lamps

Brighten your space quickly and easily with T12 fluorescent bulbs. Various lengths and diameters are available in order to meet your lighting requirements. Additionally, these bulbs come in color temperatures ranging from 4000K to 7000K and life spans lasting up to 12,000 hours. High-output fluorescent lights are great in numerous applications that demand more natural color.

Voltarc Long Lamp (Big Boys)

For bigger signs or longer letters, Voltarc's fluorescent sign long lamps reduce the number of wiring components, sockets and ballasts, while streamlining the construction process to achieve real savings compared to systems that use conventional shorter lamps. Installing 9- or 10-footers translates into fewer parts, fewer outages and less overall maintenance – adding to performance quality and cost-efficiency.

Big Signs Need Big Fluorescent Sign Lamps

Any time longer sign lamps would substantially reduce the number of lamps needed for a large sign, Voltarc's 9-foot and 10-foot sign lamps provide the best value and performance and can be used like every other straight high-output fluorescent lamp.

H/O Ballast Junction/Splice Box

Create splice boxes on the ends of the AT style ballasts, allow sign builders to use standard flexible conduit for wiring. Sizing - 2 15/16" x 3 1/16" x 2 3/8"

SKU: 17-051

Allanson Self-Regulating Outdoor - 30mA / 120V

15,000V unit replaces 15,000V / 12,000V / 10,500V / ratings. Available in conventional or enclosed. Poly-resin fill. 120V and 277V, 60Hz. Normal power factor. Ground fault protection. Mid-point ground design. Service button, LED diagnosis, auto-reset. Dimmable and flashable. 2 year limited warranty.

SKU	VOLTAGE
A-4B09N3-CB-S	5,000V - 9,000V
A-4B15N3-CB-S	9,000V - 15,000V

Allanson Standard Outdoor - 30mA / 120V

Allanson's "BPX" and "CPX" series include bypass, 3-Strike technology for ease of service and are designed for dependable nuisance-free performance. Recommended for outdoor neon signs. Secondary circuit ground fault protection, interrupting transformer output to eliminate the danger of a fire in case of an arc to ground. LED diagnostics, reduces troubleshooting time. Same dimension as all UL506 models, which means there is no need to redesign casings, raceways or existing signs in order to take advantage of a more reliable and safer transformer. A 29-minute by-pass switch, which enables efficient fault detection, in the same manner that you were accustomed to work with old UL506 transformers. Three automatic resets, eliminating nuisance tripping, providing continuous and better performance, thus saving service costs. Available in 277 and 347V, which results in potential cost savings, as you can install more transformers per circuit when compared to 120V applications.

Helpful Tip!

Reliability of the Luminous Tube Transformer:

Overloading of neon transformers may significantly affect life expectancy of the device. Additionally, external factors such as heat, moisture, and vibration can seriously effect the transformer.

Heat

The operating temperature of the transformer depends on the correct loading and proper mounting and installation. Transformers generate heat under normal operation and it is necessary to allow the heat to be expelled or dissipated.

Moisture

Whenever possible, mount the transformer in a clean, dry location. Electrical supply factors can affect the proper operation and life of the transformer.

Allanson Standard Self-Enclosed – 30mA / 120V

120v SELF ENCLOSED Transformer. Unitran Protector Self-Enclosed Style Transformer Recommended for indoor neon signs and indoor neon lighting. Outdoor non-weatherproof unitran enclosed design, providing pre-wiring for easy installation, eliminating the need for a transformer box and primary switch. Secondary circuit ground fault protection, interrupting transformer output to eliminate the danger of a fire in case of an arc to ground. Three automatic resets, eliminates nuisance tripping, provides continuous and better performance, thus saving service costs. A 29-minute by-pass switch, which enables efficient fault detection, in the same manner that you were accustomed to work with the old UL506 transformers. High power factor, 277 and 347 Volt models, which allows installation of more units on one circuit, saving material and labor costs.

Inland 33 Vacuum Oil

Inland Vacuum offers a complete line of mechanical oils for all pump types and vacuum applications. Benefits of proper pump fluid selection include longer pump life and less back streaming which leads to a cleaner vacuum system and increased productivity. Our strict quality control procedures insure a product that is recommended by major manufacturers. Through close association with the major vacuum pump manufacturers and end users, Inland has learned how to manufacture vacuum fluids that enable the vacuum pump to attain its optimal performance for all vacuum applications.

SKU	SIZE
INLAND 33	1 Liter

Diffusion Pump Oil

The ideal diffusion pump oil would be thermally stable, non-volatile, chemically inert and non-toxic. Real diffusion pump fluids, on the other hand, represent compromises between these properties; no one fluid does it all. Inland offers a broad range of diffusion pump oils, including hydrocarbon, inert PFPE, polyphenyl ether and silicone fluids for a wide range of applications. These fluids include distilled hydrocarbons, silicones, organic esters and other synthetics. This wide selection ensures that we can supply the proper fluid for your application.

Glass Neon Tubing

VOLTARC® Neon Glass Tubing

NEPCO is a stocking distributor for all Voltarc Neon Glass Tubing. Voltarc offers single coated and double coated tubing in 4' lengths ranging from 8mm-15mm.

For more information or to view a neon color chart visit www.light-sources.com

EGL® Accuwall

NEPCO is a stocking distributor of Accuwall Machine Drawn 5 foot colored glass tubing. Accuwall tubing is available uncoated or coated rare earth phosphor. Available mm sizes range from 8mm-15mm.

For more information or to view a color chart visit www.egl-lighting.com

VOLTARC® MASONLITE Millennium Electrodes

Combine the technologies of:

- Annealed lead glass for ease of welding to your sign tubing
- Superior plated shell and high tech emission coating for ease for conversion & longer life
- Wide mouth tubulation to maximize your evacuation process
- Hi-Tech ceramic collar centers arc stream - adds life to the tube
- Mica disk prevents flash back of arc stream within the tube

For more information or to view available electrodes visit www.light-sources.com

GE Silicone Adhesive/Sealer Clear

It creates a permanently waterproof seal with airtight adhesion. Adheres to: aluminum, brick, mortar, concrete, and most plastics.

SKU	SIZE
GE361	2.8 oz
GE012	9.8 oz

Weld-On 45 2-Part Structural Adhesive

Weld-On 45 is a two-component, high strength, high viscosity, reactive structural adhesive for bonding unprepared and corrosion resistant metals, composites, and plastics (e.g. ABS, acrylic, aluminum, brass, copper, galvanized steel, PETG, polycarbonate, and PVC).

***REQUIRES WELD-ON GUN FOR 50ML/400ML CARTRIDGES - SEE NEXT PAGE.**

SKU	SIZE
WO-45-50ML*	43 ml
WO-45-400ML/NEW*	400 ml

Weld-On 16 1-Part Acrylic/Plexi Adhesive

Weld-On 16 is a 1-part, **medium bodied**, fast-setting, high strength acrylic (plexi) cement. Also bonds rigid PVC, ABS, styrene, butyrate, polycarbonate to themselves and each other, as well as other plastics and porous surfaces.

SKU	SIZE
WO-16-5OZ	5 oz

Weld-On 3 Acrylic/Plexi Adhesive

Weld-On 3 is a **water thin**, non-flammable, very fast-setting solvent cement for bonding acrylic/plexi. It will also bond with other thermoplastics such as polystyrene, CAB (cellulose acetate butyrate), PETG (polyethylene terephthalate glycol) and polycarbonate to themselves. It will not bond to cross linked acrylics.

SKU	SIZE
WO-3-GAL	GALLON
WO-3-PT	PINT

Weld-On 66 Vinyl/Flex Adhesive

Weld-On 66 is a 1 part, **light bodied**, fast setting, versatile solvent cement for bonding flexible or rigid vinyl to itself or to urethane, leather, canvas, ABS, foamed PVC, butyrate, and wood. It bonds quickly upon contact with substrates and the bond strength will increase as solvent dissipates.

SKU	SIZE
WO-66-PT	Pint

Weld-On 58 Polycarbonate Adhesive

Weld-On 58 is a VOC-free, two-component, fast-setting, reactive, urethane-based adhesive for bonding a wide variety of thermoplastics, including polycarbonate, butyrate, PETG, anti static acrylic, ABS, PVC, polyurethane and foam board to themselves and one another. WELD-ON 58 is recommended for a variety of applications in the sign assembly industry, especially butyrate trimcap to polycarbonate in channel letter applications. It also has many uses in other plastic fabrication industries for bonding ABS to PETG. Excellent UV light resistance.

SKU	Size
WO-58-50ML	50 ml

Weld-On Manual Dispensing Gun 2-Part 43ml/50ml Cartridges

Manual Dispensing Gun (plastic frame) for 43 ml or 50 ml cartridges. Includes 1:1 and 4:1 Plungers

SKU	Size
WO-GUN-50ML	50 ml

Weld-On Gun High Resistance 2-Part 400ml Cartridges

A Manual Multi-Component Twin Cartridge Gun for use with between 450x450ml and 490x490ml twin cartridges featuring a static mixing nozzle. Accepts 10:1 Mix Ratio cartridges. High Thrust Drive. B-Line Multi-Component Dispensing Gun with smooth & powerful High Thrust 26:1 Ratio Drive. Albion's legendary Double Gripping Plates and steel trigger means increased durability. Manual Drive, Multi-Component Cartridge Gun. 490ml Twin Cartridge Capacity Thrust: 900 lbf, Pressure: 181 psi. 26:1 Drive. Accepts 10:1 Mix Ratio (450ml to 490ml) twin cartridges; Typically used for dispensing solid surface adhesives.

Coming Soon

Weld-On 30 is suitable for use in a variety of industries including sign assembly and many others where high bond strength and resistance to extreme environmental conditions is critical. They are especially suitable for bonding unprepared metals including Aluminium, CRS, and Stainless Steel; also suitable for bonding painted and coated metals. Has excellent adhesion to plastics such as PVC, polycarbonate, ABS, acrylic and thermoset deposits.
